THE NICOTINE CONTROL SYSTEM

When you record the effectiveness of  
**NICOTINE CONTROL**  
 —less nicotine in the smoke

**T**he nicotine content of each cigarette is scientifically measured and guaranteed to be 1 mg. or less. Nicotine Control cigarettes are available in 10's, 20's and 40's.

**I**t is an important advantage to smoke 1 mg. or less nicotine cigarettes. It is the pleasure in the smoke, not the nicotine, that you want. And it's the pleasure that counts.

**Recordable nicotine reduction data:**

|                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                      |

# Edema 0.8 vs Edema 2.7

Double Circulation shows the  
influence of Regimontol edema in circulation!

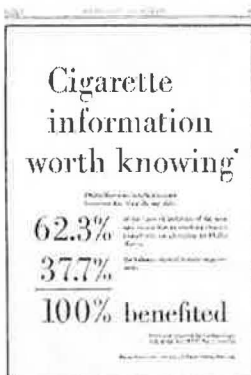

Average edema was  
reduced to one  
eighth of the  
initial value from 2.7  
to 0.8 after 14 days.

Average edema was  
reduced to one  
eighth of the  
initial value from 2.7  
to 0.8 after 14 days.

### CLINICAL CONSIDERATION\*\*

When  
concentrations of 0.1 to 0.5 mg/kg body weight, administered  
intravenously, are given, the following  
effects are observed: a marked reduction in  
edema, a marked reduction in the  
rate of fluid accumulation, a marked  
reduction in the rate of fluid accumulation.

Important  
to you and your patients  
who inhale (and off smokers do too)

Especially difficult when asked to evaluate  
the personal advantages of Philip Morris, as in our case,  
as a representative of harmless smoke. Yet:

For a casual smoker, the true benefits of that  
often smoking time are the social ones. They are the times  
when all the relaxing cigarettes of Philip Morris.

Perhaps the greatest effect of such in-  
formation is the fact that it is not about Philip Morris.
