

TOBACCO USE IN AMERICA
January 27-28, 1989
Houston, Texas

AN ISSUE FOR OUR TIMES

As a health care advocate, you realize the importance of assuring that public health issues are placed at the forefront of the 101st Congress's and the new Administration's agenda. Controversial concerns regarding tobacco control lead the list of critical health issues affecting our society. The purpose of "Tobacco Use in America" is to create an action blueprint for legislation on tobacco control issues that can be enacted by the 101st Congress and the new Administration.

CONFERENCE SPONSORS

"Tobacco Use in America" was initiated by Congressman Michael A. Andrews of Texas and is being funded by the American Medical Association in cooperation with The University of Texas M. D. Anderson Cancer Center.

The AMA together with the American Cancer Society, the American Heart Association, and the American Lung Association have jointly planned and sponsored the conference.

Congressman Richard J. Durbin of Illinois and Congressman Mike Synar of Oklahoma also have made invaluable contributions to the planning of the conference and are Congressional co-sponsors.
