

# Information is the best medicine.

Healthcare professionals perform best when they're well informed. By successfully integrating medical and information technologies, Siemens provides physicians and health executives with instant access to critical information so they can make the right decisions right away. From medication management systems to networked imaging systems, Siemens provides medical solutions to improve workflow, reduce costs and, most importantly, make cutting-edge care available to everyone, everywhere.

Whether enhancing the quality and efficiency of healthcare, developing transportation systems that make travel safer and more reliable or being the world leader in logic controllers for industrial automation, Siemens is reshaping and redefining entire industries. When you have 450,000 minds working together all around the globe, including 75,000 right here in the U.S., innovative solutions emerge. And that's what it takes to change the world.
