## New! Thorner's Psychiatry in General Practice

*New!*—By writing about the *people* who develop mental symptoms—rather than about the symptoms themselves—Dr. Thorner has contributed one of the most usable books on the diagnosis and treatment of mental disorders ever written for the general practitioner.

Here in this new book you will find an unusually simplified approach to the diagnostic problems encountered in mental cases. No elaborate terminology (so familiar to the academic psychiatrist) is included. Each situation is described in such self-explanatory language that even a layman could follow it with ease.

Treatment is, of course, the general practitioner's greatest problem with the mental patient—and Dr. Thorner gives you unwavering and specific advice on every phase of therapy. In discussing chemotherapy, he gives you exact directions for administration and definite dosages. Physiotherapeutic methods (including the use of restraints and hydrotherapy) are considered. The chapter devoted to Shock and Related Therapy covers insulin, metrazol and electroshock, electronarcosis and prefrontal lobotomy. And in his chapter on Psychotherapy, Dr. Thorner gives you a number of helpful technics for talking to and listening to the patient.

By MELVIN W. THORNER, M.D., D.Sc., Assistant Professor of Neurology, University of Pennsylvania Graduate School of Medicine. 659 pages, 6" x 9", illustrated. Price \$8.00.

**See also SAUNDERS Advertisement on Pages 2 and 3**

## Partners in good nutrition

No wonder *sugar* has been called "white magic." Its familiar white crystals help work wonders in nutrition... when combined with other good foods in many tempting ways.

Ice cream, for example, is a highly valuable nutrient carrier. Per capita consumption at the rate of 21 quarts annually is encouraged by the sugar which points up flavor and blends the ingredients into America's top-favorite dessert.

The table which follows shows the contribution in percentages of the recommended daily allowance of a typical serving ( $\frac{2}{3}$  cup) of ice cream:

### Percentage of Recommended Daily Allowance

Calories .....	6.7%	<b>Vitamins</b>	
Protein .....	5.4	Vitamin A.....	10.3%
		Thiamine .....	2.5
<b>Minerals</b>		Riboflavin .....	12.4
Calcium .....	15.6	Niacin .....	0.7
Phosphorus .....	8.3		
Iron .....	0.3		

Discovering more about the functions of sugar in human metabolism and better ways to use it in the sciences and technologies is the purpose of Sugar Research Foundation. Information about the program of scientific investigations and current findings will be sent on request.

## SUGAR RESEARCH FOUNDATION

A NON-PROFIT INSTITUTION

52 Wall Street, New York 5, N. Y.

*Grand Prize*  
*of*  
**\$25,000**  
**FOR SUGAR RESEARCH**

**T**O STIMULATE independent inquiry into the potentialities of sucrose for food and non-food functions, the Sugar Research Foundation is sponsoring the following prizes:

- A fourth intermediate prize of \$5,000 for the research project judged most significant during 1948.
- A grand prize of \$25,000, to be awarded in 1950 "for the most outstanding contribution of original knowledge concerning sugar made during the previous five-year period."

Three \$5,000 awards have been conferred to date

for significant research which has advanced knowledge of the carbohydrates. Prizes are administered by the National Science Fund of the National Academy of Sciences, and are independent of the Foundation's grant-in-aid research program.

Entries for the Fourth Intermediate Prize should be mailed to the Executive Secretary, National Science Fund, 2101 Constitution Avenue, Washington 25, D.C., before January 1, 1949. Announcement of the prize winner will be made on or about April 1, 1949. Details and regulations governing the award may be obtained from the National Science Fund.

**SUGAR RESEARCH FOUNDATION**

In response to requests from pediatricians, we are now also marketing PABENA—precooked oatmeal, enriched with vitamin and mineral supplements. PABENA closely resembles Pablum in nutritional qualities, and offers the same features of thorough cooking, convenience and economy. Supplied in 8-ounce cartons. Samples on request. Mead Johnson & Company, Evansville, Ind., U.S.A.

● Airplane view of Nestlé's Dennington factory, Victoria, Australia

● In Australia, as all over the world, Nestlé's milk products are widely used for infant feeding

## A success in infant feeding 'round the world

Strategically located plants and a network of distribution facilities supply the people of Australia, Tasmania and New Zealand with Nestlé's milk products.

During the past 80 years Nestlé's has worked closely with the medical profession to develop quality milk foods for babies . . . and has met each advance in scientific knowledge of infant feeding with a corresponding improvement in product.

No wonder, then, that for more than three generations Nestlé's milk

products have been best known and most used for babies 'round the world.

The record shows that Nestlé's was the *first* evaporated milk fortified with 400 U.S.P. units of genuine Vitamin D<sub>3</sub> per pint. The quality of Nestlé's Milk is assured every step of the way . . . we even take the plant apart every day and wash it!

That's why so many  
doctors recommend  
**NESTLÉ'S Milk**

**NESTLÉ'S**  
EVAPORATED  
**MILK**

# Summer time is Travel time for Babies, too

**T**HIS SUMMER, more babies may be traveling than ever before. Wherever they go—to farm or town, lake or mountains—the Number One need for babies is good, safe milk.

Does this present a problem for babies under your care?

Not if Pet Milk is the basis for the formula. Whether they travel to the North, South, East or West, Pet Milk will be waiting for them, exactly the same milk that agrees with them so well in their formula at home.

Every drop in every can of Pet Milk is as uniformly safe as if there were no germ of disease in the world; uniformly nutritious, because the milk solids content is standardized; uniformly easy for babies to digest, since the protein in Pet Milk is heat-softened, yielding small, friable curds in the infant's stomach.

Uniformity in highest standard of quality is the rule governing production of Pet Milk in all of the company's great plants from coast to coast. That has been the rule ever since the first evaporated milk was made by Pet Milk Company sixty-three years ago.

PET MILK COMPANY, 1438-F Arcade Building  
St. Louis 1, Missouri

## Swift's Strained Meats

**With six-weeks-old infants  
an ounce a day  
made all the difference!**

In recent test feedings\* the protein intake of six-weeks-old infants was increased 25% by the addition of Swift's Strained Meats to their formula. Each baby received approximately one ounce of meat daily (average of all babies: 27 gm.)—but what a difference it made. Meat-fed infants had higher hemoglobin levels and better red cell values than infants in the control group. Meat not only checked the drop in hemoglobin, characteristic of infants at this early age, but promoted hemoglobin and cell formation as well. It was further noted that meat-fed infants slept better at night, were more satisfied and in better physical condition generally than infants on a meatless formula.

**Six 100% meats—strained  
for earlier meat-feeding**

Swift's Strained Meats—fine enough for formula feeding—facilitate introducing meat *earlier in life*. An excellent, palatable source of complete, high-quality proteins, Swift's Strained Meats also furnish goodly amounts of thiamine, niacin, riboflavin and iron, nutrients not ordinarily plentiful in the infant diet. Swift's Strained Meats offer six distinctive flavors: beef, lamb, pork, veal, liver and heart. Each one is 100% meat, not a mixture. The tempting variety helps baby form nutritionally sound eating habits. For further information, write Swift & Company, Dept. SMB, Chicago 9, Illinois.

\*"Meat in the Diet of Young Infants"—Leverson, Ruth M., Ph.D. and Clark, George, M.D., J.A.M.A. 134, 1215 (1947)

SWIFT & COMPANY • CHICAGO 9, ILLINOIS

*All nutritional statements made in this advertisement are accepted by the Council on Foods and Nutrition of the American Medical Association.*

### ALSO SWIFT'S DICED MEATS

Tender, bite-size bits of meat—firm enough to encourage chewing. Six flavorful kinds of Swift's Diced Meats help prevent anorexia in the older baby and young child.

**SWIFT** ... *foremost name in meats*

... *first with 100% Meats for Babies*

# Sweetose\*

— a completely new type of corn syrup

— AN IDEAL CARBOHYDRATE FOR  
INFANT FEEDING

Sweetose offers many worthwhile advantages to the physician and to the mother over traditional corn syrups. The ratio of dextrose and maltose to higher sugars in Sweetose is more than twice that of conventional corn syrups. The result is a completely new type of corn syrup.

WRITE FOR FURTHER DETAILS  
**A. E. Staley Mfg. Co.**  
Box 1091, Decatur, Illinois

Clinical evidence has suggested that Sweetose is highly satisfactory as a feeding supplement. It is palative and non-laxative. It does not provoke gastrointestinal distress. It is well-tolerated by newborn and premature babies.<sup>1</sup>

With its high content of lower sugars, it appears to throw but little burden upon digestive activities at a time when they are but poorly established.<sup>1</sup>

Because Sweetose is readily soluble, it is easy for mothers to use. It will dissolve readily in milk or water at refrigerator temperatures, making it easier to mix and handle. By eliminating one or two operations in handling, formulae are much less likely to become contaminated, or support bacterial growth.

	Representative Analysis of Sweetose White Syrup	Representative Analysis of Ordinary Corn Syrup

## in CHRONIC POLIOMYELITIS

This male child, age 5½, had acute poliomyelitis in August, 1943, which left him with a marked kyphotic element in a kypho-scoliosis and with involvement of right upper extremity. Kyphosis quite high; abdominal muscles weak. A Spencer Spinal Support was first applied October, 1945, to arrest deformity and support weakened muscles. Body carriage has steadily improved. Spinal fusion postponed indefinitely.

His latest Spencer, shown above, was designed on prescription to specified heights in back and front; with 1 rigid and 1 stiff steel each side of spine; with orthopedic shoulder straps; with a special Abdominal Spring Pad to give buoyancy to movement and help increase intra-abdominal pressure.

Each Spencer Support is *individually designed, cut, and made* for each patient in non-elastic material guaranteed not to lose its shape. Yet it is *comfortable*—assuring patient cooperation.

For a dealer in Spencer Supports, look in telephone book under "Spencer corsetiere" or "Spencer Support Shop," or write direct to us.

® FOR ABDOMEN, BACK AND BREASTS

**EXPERIENCE IS THE BEST TEACHER...**

**Carlos Finlay (1833-1915)**  
*proved it in public health*

Carlos Finlay, of Cuba, a bacteriologist, believed that yellow fever was transmitted by the stegomyia mosquito. His original experiments did not provide definite proof of his theory. However, he continued his search in co-operation with Walter Reed and the Yellow Fever Commission. The work of the Commission finally proved that infected mosquitoes could transmit the

fever. The public health preventive measures derived from these experiments were so successful that the fever in Cuba was under control within a year.

R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

***Experience is the best teacher  
in cigarettes, too!***

**M**ILLIONS of smokers who have tried and compared many different brands of cigarettes have found that cool, mild, flavorful Camels suit them best.

Try Camels on your "T-Zone"—T for Taste, T for Throat. See how your taste enjoys the rich, full flavor of Camel's choice, properly aged, and expertly blended tobaccos. See if your throat doesn't welcome Camel's cool, cool mildness.

Yes! Try Camels and see for yourself why, with thousands and thousands of smokers, Camels are the "choice of experience."

According to a Nationwide survey:

**MORE DOCTORS  
SMOKE CAMELS**  
*than any other cigarette*

Three independent research organizations in a nationwide survey asked 113,597 doctors to name the cigarette they smoked. More doctors named Camel than any other brand.

# *Experience is the Best Teacher*

**Paul Ehrlich**  
(1854-1915)

*proved it in  
chemotherapy*

Paul Ehrlich, expanding on his knowledge gained as a pupil of Koch, concluded from his experiences in the staining of bacteria that there was a close chemical affinity between the cellular body and the stain. This idea led him to believe that specific drugs could be found which would kill invading pathologic organisms, without damage to the host. His conclusions helped create the science of chemotherapy, which is increasingly important today.

## *Experience is the best teacher in cigarettes too!*

Yes! Experience counts—today as always. And with the thousands and thousands of smokers who have tried and compared many different brands of cigarettes, Camels are the "choice of experience."

Try Camels yourself! See how your taste welcomes the rich, full flavor of Camel's choice, properly aged, expertly blended tobaccos. And see how your throat appreciates Camel's cool, cool mildness.

Let your own experience tell you why *more people are smoking Camels than ever before.*

R. J. Reynolds Tob. Co., Winston-Salem, N. C.

*According to a Nationwide survey:*

# ***More Doctors Smoke CAMELS than any other cigarette***

Three independent research organizations in a nationwide survey asked 113,597 doctors to name the cigarette they smoked. More doctors named Camel than any other brand.

# WHY MANY LEADING NOSE AND THROAT SPECIALISTS SUGGEST

"change to PHILIP MORRIS"\*

Where smoking is a factor in a throat condition, the physician may advise "Don't Smoke." But where the patient persists, many eminent specialists suggest "Change to PHILIP MORRIS"... the one cigarette proved definitely less irritating.\*\* Perhaps you too will find it advantageous to suggest to your throat patients "Change to PHILIP MORRIS." For your own smoking as well, Doctor, in fact for all smokers, Philip Morris is by far the wisest choice.

## PHILIP MORRIS

Philip Morris & Co., Ltd., Inc.  
119 Fifth Avenue, N. Y.

**IF YOU SMOKE A PIPE...** We suggest an unusually fine new blend—COUNTRY DOCTOR PIPE MIXTURE. Made by the same process as used in the manufacture of Philip Morris Cigarettes.

\*Completely documented evidence on file.

\*\*Reprints on Request:

Laryngoscope, Feb. 1935, Vol. XLV, No. 2, 149-154; Laryngoscope, Jan. 1937, Vol. XLVII, No. 1, 58-60; Proc. Soc. Exp. Biol. and Med., 1934, 32,241; N. Y. State Journ. Med., Vol. 35, 6-1-25, No. 11, 590-592.

**"CHANGE TO  
PHILIP MORRIS  
OR...  
CUT DOWN YOUR  
SMOKING!"**

**That is the suggestion of many of the country's  
leading specialists in cases of throat irritation.\***

Many doctors have among their patients some who they believe smoke too much. But the difficulty of persuading such smokers to cut down is familiar to everyone. What better advice therefore than "Change to Philip Morris"...the only leading cigarette proved definitely and measurably less irritating.

To minimize cigarette irritants, Philip Morris are made by a special process whose advantages are conclusively shown in published studies.\*\* These studies may convince you too that the most effective advice for patients who smoke is "Change to Philip Morris."

**PHILIP MORRIS**

## The First Vaccination . . . .

*Both Medicine and Dentistry* must thank Edward Jenner (1749-1823) for direct and indirect contributions to the professions' progress in the *prevention* of disease.

Smallpox was deadly; but so was its "prevention" by inoculation, brought from Turkey to England in 1718. Then rumors spread through the Gloucestershire countryside that milkmaids who had suffered *cowpox* were immune to *smallpox*. With his successful vaccination of little Jimmy Phipps, using matter from the infected hand of Dairymaid Sarah Nelmes in 1796, Jenner had the *proof*.

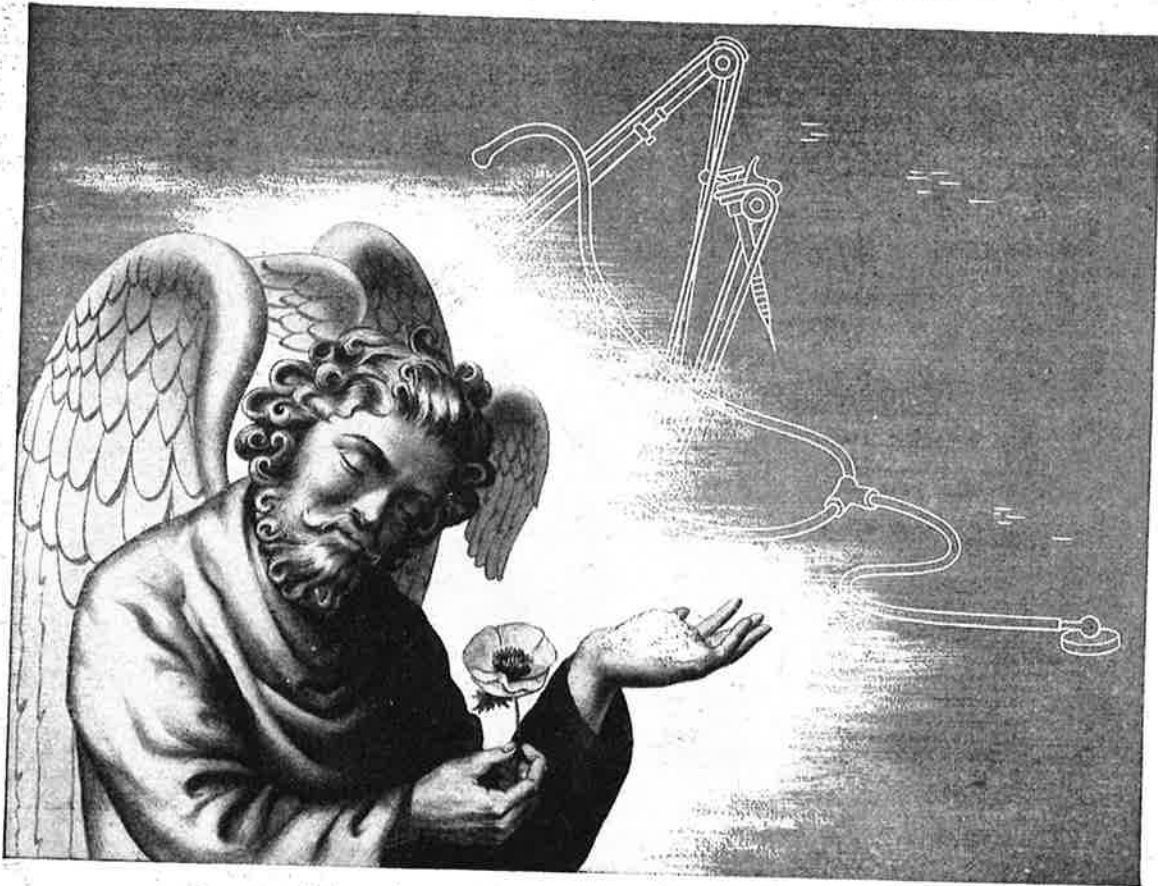

Disease could be prevented! Not only

smallpox, diphtheria, scarlet fever and typhoid, but diseases of the mouth as well—thanks to Jenner's contemporary, the French dentist, Jean-Baptiste Garriot.

*Prevention Today*, for most physicians and dentists, includes more than prevention of disease. It includes prevention of the helplessness and injustice which the doctor knows would attend most malpractice claims or suits—if it were not for the *preventive* counsel, *confidential* service and *complete* protection assured by the Medical Protective policy, developed through nearly 50 years' experience.

1899  
**MEDICAL PROTECTIVE COMPANY**  
FORT WAYNE, INDIANA

*Professional Protection* EXCLUSIVELY . . . since 1899

## The First Narcotic ...

*Medicine and Dentistry* thank a young Prussian drug clerk, Friedrich Sertürner (1784-1841), for isolation of the first pure alkaloid of opium, morphine—named for Morpheus, god of Dreams, son of Somnus, god of Sleep.

A physician's lament over the unreliability of opium prescriptions spurred Sertürner to a 15-year search for the secret locked in the juices of the poppy plant. His addition of ammonia to an opium solution in 1806 caused a formation of gray crystals, from which he succeeded, in 1816, in wresting the real *principium somniferum*—morphine itself.

In its wake have come not only all the barbiturates and milder anodynes, but also many alkaloids isolated by methods similar to Sertürner's: heroin, emetine, quinine, veratrine, strychnine, etc.—pure, dependable drugs bringing new standards to medicine and dentistry.

★ ★ ★

*And Doctors After 1899* found new standards in malpractice protection—the *complete, preventive and confidential* counsel and service provided for physicians and dentists by the Medical Protective policy.

**THE**  
**MEDICAL PROTECTIVE COMPANY**  
**FORT WAYNE, INDIANA**

*Professional Protection* EXCLUSIVELY... since 1899

Investigation into the etiology of many epidemics of gastroenteritis and typhoid has revealed that contaminated well and tap water were the offending agents.

**NO EPIDEMIC HAS BEEN TRACED TO BOTTLED CARBONATED BEVERAGES:** laboratory and clinical observations indicate that the action of carbon dioxide is both bacteriostatic and fungicidal against many pathogenic organisms. It is particularly effective against the colon-typhoid group.<sup>1,2,3</sup>

950,000 B. coli per cc. decreased to 20,000 in 28 hours.

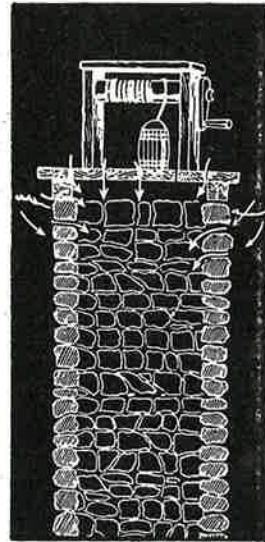

200,000 typhoid bacilli reduced to 25,000 in 4 hours.

The above figures were the result of tests by Young, Sherwood and others in which bacteria were dropped into a bottled carbonated beverage containing 2.6 volumes of carbonic gas.

Modern techniques employed by the manufacturers of bottled carbonated beverages embody the highest principles of chemistry, bacteriology and engineering.

# *Wish you had Wings? Why bother!*

White sidewall tires, as illustrated, available at extra cost.

**Y**OU'VE been there, we know — trapped in the crawling snarl of a sunny week-end's traffic — tangled in the push of a city's busiest rush hour.

And more than once you've wished for wings — so you could duck all this, dodge the jostle, the stress and the strain.

**W**ell, just spot those long, sleek new Buicks with the word "Dynaflo"\* on their taper-thru fenders. They've got the answer — to easy, open-road flight and to the place where traffic's densest and driving tension greatest.

With Dynaflo, you just sit there, press the gas treadle — and steer!

**A**t a crawling 5 mph, you roll as smoothly, easily, lightly as at a winging 45.

At every opening left by a stalling, laboring

neighbor, you have instant-quick power-surge to let you take advantage of it.

Upgrades? Stop signs? A touch on the gas treadle or brake pedal handles every situation — for there is no clutch pedal, and no gears *ever* shift as you drive. Yet the moment any bottleneck breaks, you move smoothly, swiftly up to boulevard speeds, pacing the pack.

**S**moothly did we say? The word is hardly adequate. This velvety lift, this soaring swoop of power, this utter freedom from any break in your stride are things you need to experience to judge.

Why not try it out? Your Buick dealer will do the best he can to arrange a trial.

See him — place your firm order — and you'll stop wishing for wings!

\* Dynaflo Drive is optional at extra cost on Roadmaster models only.

## ***BUICK alone has all these features***

- ★ DYNAFLOW DRIVE (Optional, Roadmaster Series)

## *Buoyant answer to Back Road and Boulevard*

White sidewall tires, as illustrated, available at extra cost.

**R**EMEMBER that rough patch of road up yonder yawning with ruts and ridges?

Recall the tiring tenseness brought on by the drum and hum of road noise and tremor?

Well, clock away the miles in this stunningly styled Buick — and meet up with the sweetest answer to such matters this side of cloud cruising.

“It’s a ride that’s soft and smooth as velvet,” folks tell us. And we tell them it comes from a host of things.

It comes from the ample roadweight of a two-ton car so beautifully balanced it handles light as a baton.

It comes from the leveling buoyancy of Buick’s all-coil springing—from the softness of bigger, lower-pressure tires—from the sure-footed, swerve-free steadiness of

Buick’s Safety-Ride rims, widest in the industry.

**A**nd it comes in special measure from a brand-new engineering gem we call Vibra-Shielding which banishes vibration build-up.

Here for the first time you’re freed from the motoring fatigue brought on by tiny tremors piling up into bigger ones. Here your miles are made moss-smooth and quiet — now long journeys become mere jaunts.

**S**o why delay knowing the most buoyant answer to any road you ever traveled?

Go visit your Buick dealer right now and know at first hand the distinctive styling, the flashing action, the velvety ride over highway and byway that are Buick’s and Buick’s alone.

Then follow your heart’s desire and get your order in *promptly*.

Tune in HENRY J. TAYLOR, Mutual Network,  
Mondays and Fridays

# PROLONGED ESTROGENIC ACTION

*Effective Orally*

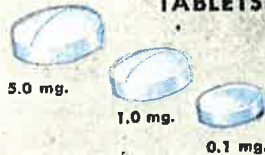

AS WELL AS PARENTERALLY

Diethylstilbestrol dipropionate, a synthetic substance, is the dipropionyl ester of  $\alpha, \alpha'$ -diethyl-4-4' stilbenediol. Compared to the non-esterified stilbestrol, it is absorbed more slowly, is effective in smaller doses, and has a more prolonged action.

While diethylstilbestrol dipropionate produces excellent results when administered parenterally, it is thought to be almost as effective, milligram for milligram, when given orally.

Physicians are invited to send for additional literature.

**THE BARDACH-SCHOENE****VACULIMB\***Eliminates Shoulder or Waist  
Suspension Harness

This new American development in artificial limbs avoids the use of external leather straps or mechanical moving parts that touch the body. The VACULIMB utilizes the principle of a vacuum, assuring far greater comfort. It fits close and accurately, and produces a feeling of lightness, obviating the usual pumping action which causes irritation.

This type limb has been in successful use in Europe for many years, so it is not an experiment.

May we send you special literature about the VACULIMB—and the Bardach-Schoene limbs in general? We cooperate with physicians, making special limbs for their patients. Each case is personalized.

\* Trade Mark applied for.

## For patients affected by nicotine, suggest

# John Alden

There is practically no nicotine in the smoke of John Alden Cigarettes, Cigars and Pipe Tobacco. Their tobaccos are *not* processed for removal of nicotine but *bred* that way.

A new type tobacco. Developed by the Kentucky Agricultural Experiment Station, this new type tobacco is certified by the U. S. Dept. of Agriculture to have *not more than 8/10 of 1% nicotine in the leaf*. Actually, the 1947 crop averaged less than 2/10 of 1% nicotine—or about 1/10 of that in ordinary tobacco.

What this means to the physician. To the doctor it means less trouble with patients who want to smoke, but to whom nicotine is a hazard. To the patient it means continued smoking pleasure. Because there is so little nicotine in the leaf, there is practically *none* in the smoke. Popularly priced for the average smoker.

Let us send you samples of JOHN ALDEN Cigarettes and Cigars, FREE. Write now for this trial package and descriptive booklet without obligation. (On your office stationery, please.)

JOHN ALDEN TOBACCO COMPANY  
11 West 42nd Street, New York 18, N. Y.

Much less

## Physicians' Kits and Supplies for **CYTOLOGY METHODS**

for the diagnosis of early uterine cancer

- ✓ PAPANICOLAOU-TRAUT METHOD
- ✓ AYRE'S "SURFACE BIOPSY" METHOD

**IMPORTANT!** The taking of smears, scrapings, etc., in preparation for staining and diagnosis is a relatively simple matter and can be done by any trained Physician or Technician. The staining and diagnosis should be done only by those prepared by intensive training in the technic. Cytology interpretation is highly specialized and requires the experienced judgment of Cytologists especially trained in the field.

### PHYSICIANS' KITS:

The Kits listed below include all the materials necessary for taking cytology samples and mailing them to laboratories specializing in their diagnosis.

**A-2257 PHYSICIANS' Uterine Cancer Cytology Outfit, includes:** 4 dozen Ayre's "Surface Biopsy" Scrapers (A-2260), 2 Vaginal Pipettes (A-2263), 1 Aspirator Bulb (A-2264), 1/2 gross "Rite-On" slides (A-1460X), 2 dozen Two Slide mailers with envelopes (A-1625C), with directions ..... Each \$6.50

**A-2255 PHYSICIANS' Uterine Cancer Cytology Outfit, includes:** 1000 Ayre's "Surface Biopsy" Scrapers (A-2260), 12 Vaginal Pipettes (A-2263), 3 Aspirator Bulbs (A-2264), 1 gross "Rite-On" slides (A-1460X), 3 dozen Two Slide mailers with envelopes (A-1625C), with directions ..... Each \$28.75

**A-2256 PHYSICIANS' Uterine Cancer Cytology Outfit, same as A-2255 but with 250 Ayre's "Surface Biopsy" Scrapers (A-2260) ..... Each \$18.75**

### WRITE FOR LITERATURE
