VOLUME 93, No. 22

535 North Dearborn Street, CHICAGO, ILL.

NOVEMBER 30, 1929

CONTENTS AND SUBJECT INDEX

Anemia of Pregnancy. Charles E. Galloway, M.D., Evanston, Ill. 1695
Discussed by Drs. Watkins and Galloway.

Solution of Acacia and Sodium Chloride in Hemorrhage and Shock: Effects of Intravenous Administration. Lester D. Huffman, M.D., Los Angeles. 1698
Discussed by Drs. Hanzlik, Keith, Landesman and Huffman.

Exhaustion States. C. W. Dowden, M.D., and W. O. Johnson, M.D., Louisville, Ky. 1702
Discussed by Drs. Cheney, Dock, Davis, Cecil and Johnson.

Plastic Surgery of the Renal Pelvis and Ureter. Prof. Dr. Alexander von Lichtenberg, Berlin, Germany 1706

Factors Influencing the Operative Procedure in Hydronephrosis. W. C. Quinby, M.D., Boston. 1709

Urinary Obstruction and Hydro-nephrosis: Resection of the Renal

Pelvis, the Kidney and the Ureter; Report of Nine Cases. Waltman Walters, M.D., and W. F. Braasch, M.D., Rochester, Minn. 1710

Papers of Drs. von Lichtenberg, Quinby, and Walters and Braasch discussed by Drs. Keyes, Braasch, Lee-Brown, Scholl, Burford, Thomas, Howard, O'Connor and Hartman.

Penetrating Wounds of the Chest: Review of Three Hundred and Forty-One Cases. F. K. Boland, M.D., Atlanta, Ga. 1716

The Diagnosis of Diaphragmatic Hernia with Acute Obstruction. Frank Scott Gibson, M.D., Cleveland 1719

Empyema, Acute, Chronic and Tuberculous: Report of Fifty Cases Treated by Tidal Irrigation and Suction. Deryl Hart, M.D., Baltimore 1724

Papers of Drs. Boland, Gibson and Hart discussed by Drs. Hedblom, Dolley, Coffey, Truesdale, Brunn, Wangenstein, Schiffbauer, Boland, Gibson and Hart.

MEDICAL EDUCATION, REGISTRATION AND HOSPITAL SERVICE

Medicine in Service. Ray L. Wilbur, M.D., Washington, D. C. 1754

EDITORIALS

The Distribution of Iodine in Relation to Goiter. 1732

Ventilation and Health. 1732

Addison's Disease and Tuberculosis of the Suprarenal Glands. 1734

CURRENT COMMENT

Ajinomoto 1734

Purified Bacteriophage. 1735

Change in Volume of the Liver. 1735

The Immunologic Endocrine. 1735

Bulletin

TWO NEW SUCCESSES

Christopher's *Minor Surgery*, published August of this year, has already gone back to press for reprinting—after only three months.

Pelouze's *Gonorrhea in the Male* is back for its fourth printing!

The Mayo Clinic Volume

■ The aim of this annual volume is to bring new aid to the physician at the bedside and to the surgeon in the operating room.

The wide appeal of the current volume is well illustrated by this analysis of the articles: 71 articles of special interest to the surgeon, 63 articles of special interest to the internist, and 62 general articles of interest both to the surgeon and to the practitioner.

To illustrate the very definite appeal of the book to practitioners: There are articles on the diagnosis of gastric ulcer, the nature and treatment of toxemia of intestinal obstruction and ileus, treatment of nephritis, treatment of diabetes, thyroid problems, treatment of neurosyphilis by malaria, ketogenic diet treatment of epilepsy, focal infection in chronic and recurring diseases, preventive medicine . . . to mention only a few articles from which the practitioner will derive practical help. In all, there are 196 articles with 288 illustrations.

By WM. J. MAYO, CHARLES H. MAYO and their ASSOCIATES at the Mayo Clinic, Rochester, Minn., and The Mayo Foundation, University of Minnesota. Octavo of 1197 pages, with 288 illustrations. Cloth, \$13.00 net.

Other SAUNDERS BOOKS on Pages 3, 4, 5

Number 37 of a series of advertisements in national magazines addressed to the laity and setting forth some of the accomplishments of Medical Science in the diagnosis, treatment, and prevention of disease.

"God rest ye, little children, let nothing you affright."

The story of a great Christmas Gift

Lighted tapers in the hands of child carollers gleamed through the gentle snow. Small voices hymned Mulock's ancient and luminous assurance, "God rest ye, little children." Through Berlin's dimly lit Ziegelstein Strasse, that Christmas night in 1891, the spirit of peace seemed to rest upon all God's creatures.

Yet, only a few steps away from the happy singers, in Bergman clinic, a little girl lay gravely ill of diphtheria.

Suddenly through the snow and the music hurried the famous scientist, Emil August Behring—preoccupied, tense, fully aware that the mission he was about to fulfill might prove to be an epoch-making one.

Entering the sick room, the bearded scientist bent over the suffering child, deftly passed a hypodermic needle under her skin—and injected the first dose of diphtheria antitoxin ever given. The little girl recovered.

What a happy Christmas gift for this child and for all the children to come after her! After years of tireless effort and many bitter dis-

appointments, Behring in Germany, Roux in France, and other devoted scientists had discovered in this antitoxin a sure method, not only of curing diphtheria, but of rendering children immune to it.

A heritage that all can share

Less than two months after Behring's announcement was made to a scientific congress at Budapest, Parke, Davis & Company began the manufacture of diphtheria antitoxin in America. During succeeding years, we have been steadily improving the quality and effectiveness of this life-saving serum.

Through the preparation of many serums, antitoxins and vaccines for the prevention of disease, Parke, Davis & Company have been privileged to play a vital part in the never-ending task that faces medical science in guarding life and health.

And nothing in our work has given us greater satisfaction than the knowledge that we have helped to lift the shadows of illness and pain from the lives of little children.

ZOALITE INFRA-RED THERAPY NOW *ESPECIALLY* INDICATED!

COLD weather, with its sequence of diseases which respond so satisfactorily to infra-red, emphasizes the physician's need for the famous Burdick Zoalite Lamp.

The physiologic effects of this lamp are, in local action, decongestive, analgesic, relaxing, and, in general action, sedative, restorative and eliminative—as proved by Zoalite results obtained by over 40,000 physicians.

The Zoalite gives penetrating, soothing heat which often obviates hypodermics and displaces entirely the heavy hot water bottle with its frequent disturbance to the patient.

For complete Zoalite data, kindly mail the coupon.

**Burdick
Zoalite
Infra-red Lamp**

Its patented generator is most efficient. Day in and day out it operates with highest intensity without adjustment or attention. It is quiet, clean, convenient, durable, portable, and economical in price and use—a lamp of typical Burdick reliability.

MALNUTRITION

The science of Nutrition has recently taken its rightful place among the most important of the studies which aim for the betterment of life.

The physician realizes the importance of diet in maintaining health, and is now effectively employing diet in the treatment of his cases.

More and more, the far-reaching results of Malnutrition are being recognized — among them being anemia, muscular weakness, faulty posture, gastro-intestinal disorders, mal-development of bones and teeth, greater susceptibility to infection, nervous troubles, etc.

Used as a table beverage or as a between-meal luncheon, Horlick's Malted Milk often produces marked improvement in cases of malnutrition. The reason why Horlick's is so remarkably nutritious is that it contains the valuable elements not only of wheat and malted barley, but also of full-cream cow's milk, thoroughly modified, including the vitamins and mineral elements both of the milk and grains. The presence of the malt insures maximum digestibility and assimilability.

An eminent authority has recently said: "*No child should be allowed to suffer physical or mental retardation through malnutrition.*"

WHY NOT END ODORS

... RIGHT AT THE SOURCE ?

Many of the Nation's Leading Hospitals—

Have found The CLARITOR indispensable in the treatment of malignant cases such as Gangrene, Colostomy, Cancer, Burns, Urinological Cases, and also in connection with the bedpan.

The CLARITOR makes it possible to provide wholesome and pleasant air conditions in rooms or wards where such cases are confined by destroying every trace of odors at the source.

A portable . . . vibrationless . . . lightweight . . . self-contained unit, The CLARITOR is simply hooked on the frame of the bed. The rubber tube is placed under the bed clothes, and the electric cord attached to an outlet. Instantly, all odors are drawn into The CLARITOR where they are absolutely clarified. The clean, odorless air is then again released into the room.

The CLARITOR is built for years of uninterrupted service. There is nothing to adjust or replace. For details on a trial installation, mail the coupon, or phone the nearest Colson store.

WHEN THE DOCTOR IS JUDGE

When demanding evidence on the therapeutic value of an antisyphilitic arsenical, the physician asks first and foremost how effectively it destroys the spirochetes.

For Neosalvarsan, the proof of efficiency will be accepted at once. Here is the evidence:

The expert testimony of Ehrlich who, after synthesizing a large number of soluble arsenicals, selected Neosalvarsan because it combines high potency with ready solubility and low toxicity.

The indisputable clinical findings, comprising thousands of published reports from all parts of the world during the last seventeen years.

The results of the trypanosome test—an effective laboratory index of spirocheticidal activity—which has been adopted by the manufacturers of Neosalvarsan as a routine procedure—an additional guarantee of high antisyphilitic potency.

Furthermore, Neosalvarsan fully meets the requirements for chemical purity and ready solubility. Its margin of safety is at least 50% greater than demanded by the Public Health Service.

Write for illustrated booklet *Syphilis: Suggestions on Technic and Schedules of Treatment*.
