

Journal of the American Medical Association.

Editor: N. S. DAVIS, M.D., LL.D.

THE Official Organ of the American Medical Association. Published weekly in the place of the annual volume of Transactions that was formerly issued. It contains thirty-two pages of reading matter each week, distributed in the following departments: Original Matter; Editorials; Editorial Summary of Progress; Correspondence, Domestic and Foreign; Proceedings of Societies; Association News and Miscellany.

The JOURNAL has a wide circulation, going to all members of the Association and many subscribers in every State and Territory.

Subscription Price, Five Dollars Per Annum.

Address,

Journal American Medical Association,

65 RANDOLPH STREET, CHICAGO, ILLINOIS.

CHICAGO MEDICAL COLLEGE

Medical Department of the Northwestern University. Sessions of 1883-84.

Medical Department of the Northwestern University. Sessions of 1883-84. The Collegiate Year in this Institution consists of REGULAR AUTUMN AND WINTER SESSION and a special SESSION FOR PRACTITIONERS. THE REGULAR SESSION begins September 25, 1883, and closes March 26, 1884. This College was the first in the United States to adopt a graded system of instruction. All applicants for admission must possess at least a good English education, and present full evidence of the same. If an applicant has received the degree of A.B., or presents a certificate from some reputable Scientific school, High school or Academy, no matriculation examination will be required; otherwise he must sutsain a statisfactory examina-tion before a committee of the Faculty. The students are divided into FIRST YEAR, SECOND YEAR and THIRD YEAR CLASSES, instruction being given simultaneously in different lecture rooms. The clinical advantages of this College, with the great number of Dispensary, College Clinic and Hospital patients, cannot be surpassed. All pro-fessors of practical branches are members of the staff of Mercy or St. Luke's Hospital, or other charities. For several sessions each senior student has had the privilege of attending upon one or more obsterical cases, and of witnessing important obsterical case. It is the aim of the Faculty to make all the instruction in this College pre-emiluently practical. THE PRACTITIONER' COURSE, designed for Practicing Physicians, only, was inaugurated in 1880. It has proven so satsfactory to all concerned that it will be continued and constitute a portion of each collegiate year. This course will begin the day following the public Commencement exercises and continue for four weeks, affording by means of didactic and daily clinical instruction, special advantages to physicians for a rapid, yet thorough, practical review of the most important subjects in Modicine and Surgery. FEES FOR COLLEGIATE YEAR (except Practitioner's Course), **576**. Registration Fee, **65**. Demonstrator's Tick

Ticket, **86**. Mercy Hospital Ticket, **86**, Final Examination Fee, **830**. For Practitioners' Course, incl Tickets, **830**. For the Annual Announcement and Catalogue, or for any information relating to the College, address

LESCER CURTIS, M.D., 1558 Wabash Avenue, Chicago, III.

R. WARNER &

(FOUNDED 1856.)

We have had occasion to refer in a previous number of our journal to the firm of Wm. R. Warner & Co., of Philadelphia. Our acquaintance with this firm, and our own personal knowledge of their method of the production of their remedies; justify us in giving to them an extended notice. The value to the physician of the pharmaceutical products of a known standard and value cannot be overestimated. We have so many tinctures, extracts, both solid and fluid, pills, granules, and preparations of every description, that are either wanting in strength or care of preparation, or in official value. that the results obtained are disappointing to the practitioner in almost every case, and reputable houses owe it to themselves and their patrons to see that all their products have a trade-mark, which in no case will cause annoyance or failure from any of these causes. Wm. R. Warner & Co. have expended large sums in procuring and testing the value of new remedial agents; they have the finest and best equipped laboratory in the country, and were the first to introduce many of the recent preparations which have become of so much value, not one of which has failed to be of use. We have been using their different pills with great success, and heartily recommend them to the profession. The manufacturer of chemicals and pharmaceuticals in these days must make the most strenuous efforts in order to be in the advance which is constantly being made in the discovery of new agents, new methods of preparation, and their introduction under special and careful instructions to practitioners —*New York Medicul and Gurgleal Journal*.

WARNER'S PILLS.—We beg to call the attention of our subscribers to the Messrs. Warner's advertisement. Their pills are thoroughly reliable, and, being carefully sugar-coated, are entirely tasteless. The use of sugar as a coating for pills has been objected to. It has been stated by some that in sugar-coated pills the drugs become dry and hard, and soon lose their efficiency. This we can state for a positive fact not to be the case, having lately used and examined some of Warner's pills which had been kept in stock for over four years, and in which, on section, the mass was found to be quite soft. From our own experience, we have no hesitation in r.commending others to use these preparations, as they are sure to be reliable and to give satisfaction —Canada Medical and Surgical Journal.

The solubility of COATED PILLS is a matter of very great importance to the physician who may desire to prescribe those of quinine and other medicines offensive to the taste and smell. Various experiments from different sources have demonstrated the fact that the sugar-coated pills prepared by Wm. R. Warner & Go. are the most soluble and reliable in this respect. Those containing quinine are made of good material and full strength, as demonstrated by chemical analyses. These facts were established by Leroy M. Vale, M.D., of New York, and A. B. Lyons, Analytical Chemist, Detroit, and others. And the well-known reputation of the house is a sufficient guarantee.—Southern Medical Record.

WARNER'S SUGAR-COATED PILLS.—It is of some importance that medicines should be administered in as small a compass and in as palateable form as possible. We therefore hail with pleasure any improvement that is made in this department of pharmacy. To some of these pills we have given a fair trial. They are elegantly prepared, the sugar-coating being an especially grateful vehicle to fastidious patients, and we have found them to answer every purpose for which they are intended. We can, moreover, recommend the phosphorus pills, provided they are taken only under med-ical supervision.* To say that they are a "valuable remedy for lapse of memory, impotency, loss of nerve-power, paralysis, etc., may induce the public to resort to these pills without medical advice, and to take more than is good for them — Medical Press and Circular, London.

The sugar-coated pills of Messrs. Warner & Co., which have received a prize medal at all the great international exhibitions, have received a high reputation, and are now being introduced by Messrs F. Newberry & Sons, 37 Newgate Street, London. Their Sugar-Coated Phosphorus Pills have an especially high indorsement from the jurors of the International Exhibition, who attest their solubility, their reliable character, the perfection of their sugar-coating, and their thorough composition and accurate subdivision. A special certificate is given as to their Pill of Phosphorus, that the element is thoroughly diffused and subdivided, although perfectly protected from oxidation. These Phosphorus Pills are presented in numerous combinations of a useful character, including a variety of the leading tonics, stimulants, and sedatives, and a list of such combinations is available to subscribers.—London Medical Becord.

 measure Hecord.
 RoMs, February 20, 1878.

 Having been requested to give my opinion on the action of the American sugar-coated pills prepared by the firm of Warner & Co., of Philadelphia, U. S., and particularly on those containing phosphorus at the dose of 1-100 grain and ½ grain extract of nux vomica, I am able to certify with entire truth that I found this remedy very useful in many cases of diseases whose nature was principally nervous, and in cases of anamia and general debility.

 A woman sick with ataxia felt greatly better from the continued use of phosphorus and nux vomica under the above said form.

 In gastralgia, in difficult digestion with wind dyspepsia, I found it to be a curative medicine.

 In the different formes of hysterica, and in hysterical neuroses, I also obtained excellent results with it.

 In general falling away and debility, and in weakening of the muscular forces, the phosphorus with the nux vomica made also a good proof, as well as in anæmia, in which, however, I ordered, together with the pills, iron under different form of sugar-coated pills, is a real acquisition for the cure of disease, because of the good quality of the drugs employed, and that it is to be wished that other medicines should be prepared in the same way which is found sure and easy in practice by reason of the exact dose, and is agreeable to the patient who generally dislikes the ordinary pharmaceutical preparations, especially under a liquid or pulverized form.

 The aith effectuarts of the form of the Hospitals, Professor and Director of the Royal Dermo-Siphylopatic Clinic of Rome.

 Rome. February of 1888

ROME, February 26, 1878.

The pills of phosphorous and nux vomica of the firm of Warner & Co. were of undoubted utility to me. I availed myself of them, using some-times iron together, in several of those cases in which I used to give phosphorus, as in hysteria, in neuroses, in dyspepsia, in a few cases of paralysis, in cachesize of the swamps, in anæmia, in debility, in decaying of the forces, and in ataxic and adynamic fevers. Wherefore my opinion is that the said sugar-coated pills may render great service to therapeutics, not only by reason of the well-dosed proportion of the drugs employed, but also hy reason of the exact preparation. LEONARDI (PHYSICIAN).

WM. R. WARNER & Co.—We desire to call the attention of our readers to the advertisement of this house. It is one of the most reliable houses, in the United States, and all the preparations which they advertise can be depended upon to be as represented. We have used their medicines ourselves, and have never been disappointed. It is becoming more and more necessary to make remedies as little repulsive to patients as possible, and therefore those elegant preparations, as are many of the elixits, syrups, and sugar-coated pills, are becoming popular among physicians: but a frequent drawback is the unreliability of the prepar-ations of many manufacturers. This objection, however, we know, does not hold in regard to those of Warner & Co.--*Clincinnali Medical News*.

We have received several specimen bottles of Sugar-Coated Quinine Pills from Wm. R. Warner & Co., and always find them exceedingly fine in appearance, and we have always found them to be very reliable. They do not only prove to contain the required amount of quinine, but they are fol-lowed by *immediale effects*. This proves that they dissolve quickly in the stomach. In prescribing medicine in pill form we ordinarily allow some time for the pills to dissolve, and some pills require a long time. Not so with these, and they may be relied upon with entire confidence.—American Medical Journal.

WM. R. WARNER & Co.—This celebrated Philadelphia firm of wholesale druggists and manufacturing chemists received the first prize at the International Exhibition of 1876 for their sugar-coated pills, which were certified by the judges as being soluble, reliable, and unsurpassed in the perfec-tion of sugar-coating, thorough composition, and accurate subdivisions. They may be relied upon for pure chemical and pharmaceutical preparations. They are specially commended for phosphorus pills.—Oamedian Journal Medical Science

SUGAR-COATED PILLS AND GRANULES.—We see no preparation of this class more elegant than those made by Wm. R. Warner & Co., of Philadelphia. Mr. Warner has long been engaged in the manufacture of pills and granules, and our friends will find whatever he makes not only satisfactory in appearance but perfectly reliable.—*Cincinnati Lancet and Observer*. Messrs. WM. R. WARNER & Co., of this city, are justly celebrated for the uniformity and excellence of their sugar-coated pills. We have recently been trying their quinine pills thus prepared, and they are certainly as easy to swallow, as efficient and as neatly prepared as any we have ever seen.—*Medical and Surgical Reporter*.

SUGAR-COATED PILLS.—The prejudice against this form of coating is being overcome by the superior preparation of Warner & Co.'s pills. Quinine pills a year old show a soft and easily soluble interior on being cut open. Their pills are in every case reliable, so far as our experience with them goes.—Bufalo Medical and Surgical Journal.

PHILADELPHIA, DECEMBER 220, 1882. An analysis of seven samples of Quinine Pills obtained without knowledge of the manufacturers, was made and published in the American Journal Of Pharmacy by me, and those made by WILLIAM R. WARNER & CO. were found to be correct as to quantity and purity of Quinine. HENRY TRIMBLE, (Analytical Chemist.)

MEDICAL DEPARTMENT OF THE UNIVERSITY OF LOUISIANA. NEW ORLEANS.

FACULTY

FITY ERNEST S. LEWIS, M.D., Professor of General and Clinical Obstetrics and Diseases of Women Children.

SAMUEL M. BEMIS, M.D., Professor of the Theory and Practice of Medicine and Clinical Medicine. STANFORD E. CHAILLÉ, M.D., Professor of Physiology and Pathological Anatomy. JOSEPH JONES, M.D., Professor of Chemistry and Clinical Medicine. SAMUEL LOGAN, M.D., Professor of Anatomy and Clinical Surgery.

T. G. RICHARDSON, M.D., Professor of General and Clinical Surgery.

JOHN B. ELLIOTT, M.D., Professor of Materia Medica and Therapeutics, Clinical Medicine Hygiene. ALBERT B. MILES, M.D., Demonstrator of Anatomy.

The next annual course of instruction in this Department (now in the fiftieth year of its existence) will commence on Monday, the 22nd da October, 1883, and terminate on Saturday, the 29th day of March, 1884. The first four weeks of the term will be devoted exclusively to Clir Medicine and Surgery at the Charity Hospital; Practical Chemistry in the Laboratory; and dissections in the spacious and airy Anatomical Ro of the University. The means of teaching now at the command of the Faculty are unsurpassed in the United States. Special attention is called to the opportun

presented for

Presented for CLINICAL INSTRUCTION. The Act establishing the University of Louisiana gives the Professors of the Medical Department the use of the great Charity Hospital, school of practical instruction. The Charity Hospital contains nearly 700 beds, and received, during the last year, nearly six thousand patients. Its advantages for practical si rare unsurpassed by any similar institution in this country. The Medical, Surgical and Obstetrical Wards are visited by the respective Professor charge daily, from eight to ten o'clock A. M., at which time all the Students are expected to aftend, and familiarize themselves, AT THE BEDSIDE THE PATIENTS, with the diagnosis and treatment of all forms of disease. Special instruction is given to the candidates for graduation, who are, for this purpose, divided into classes, assigned to the respective Professor charge of the wards in the Hospital, and required to keep records of cases under their care. The classes thus formed interchange courses, so a enable the candidates to enjoy equal advantages. Throughly competent Chiefs of Clinical Teachers in developing to its full extent system of instruction. Students who are not candidates for graduation make the daily hospital rounds with any of the clinical teachers. The Administrators of the Hospital elect, annually, after competitive examination, TWELVE RESIDENT STUDENTS, who are maintained by Institution. Institution.

Journal of the American Medical Association.

This Journal has been established to take the place of the annual volume of transactions, and will be furnished to all members. It will be issued weekly, and will contain each time thirty two pages of reading matter. It is the official organ of the Association, and will contain all papers read at its meetings. A summary of progress in Medical and allied sciences will form a feature of each issue. A series of correspondents in all the chief cities of this and foreign countries will give full information in regard to medical matters in those places.

Even before starting, the success of the Journal has been assured by its large list of pledged subscribers scattered through every State and Territory of the United States.

Subscription price to non-members, \$5.00 in advance. Address, JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION,

65 Randolph St., Chicago.

The On account of its very wide distribution it is one of the most valuable mediums for advertising.

[JULY, 1883.

PARKE, DAVIS & CO.'S

IMPROVED

EMPTY CAPSULES.

ADVANTAGES. The advantages to be gained from the employment of Empty Capsules in argument.

argument. It is frequently desirable to give a medicine in its crude state and in the form of a powder, as in the case of emetics, capsicum, Dover's powder, etc. The exhibition of these drugs in this form by simple admixture with sugar or water, or syrup, as is the usual custom, has a tendency to bring scientific medicine into much disfavor with the public, and to correspondingly bring the school of practitioners who study palatability at the expense of the medicinal properties of the drug, into favor. By the use of the capsule, the physician may, at the bedside, dispense the most disagreeable drug, completely disguising its objectionable features, and with nearly the same ease and quickness that he would prepare a powder. To the practitioner in the country, especially removed as he is from the pharmacist and obliged to dispense his own medicine, the ampty Capsule becomes a great aid. Nausea and vomiting are frequently due rather to the taste of the medicine than to its direct action on the stomach.

CONVENIENCE. We put Capsules up in boxes, containing 100 each, which may confor extemporaneous use. The facility with which they may be filled, with a little practice, makes them scarcely less desirable on the score of convenience than powders.

SOLUBILITY. The method of our preparation of the gelatine makes it very readily solubleparticle the absorption of the drug.

DIRECTIONS FOR USE.

Our Capsules are composed of two small tubes of prepared gelatine, one sliding into the otner, and each closed at one end. The remedy employed is then separated into proper doses, one of which is placed in the smaller tube, which is then "telescoped" into the larger. It is now in the shape of a small cylinder, $\frac{3}{8}$ to $\frac{1}{2}$ an inch in length and $\frac{1}{8}$ to $\frac{1}{4}$ in diameter, and closed at both ends.

It is recommended to place the capsule under the tongue of the patient, against the front gums, requesting him to forget the presence of the "pill," allowing the tongue to lie naturally. He must then swallow a large drink of water, and to his surprise will find that the Capsule has disappeared.

It is a well known fact that Capsules have borne the reputatian of absorbing moisture and sticking together under the effect of the extreme heat of a Southern climate. We, therefere take this occasion to direct attention to the fact that our improved empty capsules are manufactured to avoid this objection. Care should be taken, as a general precaution, that they are not necessarily exposed to dampness, as it is a property of gelatine itself to absorb moisture under certain conditions. We should recommend, where large quantities of them are dispensed, that they be emptied from the paper boxes into the ordinary salt mouth bottle of the shop furniture.

OUR CAPSULES ARE IN SEVEN SIZES.

They are put up in neat sliding paper boxes, containing 100 each, for which we charge 25 cents each. We will mail a box to any address on receipt of price and three cents postage.
