London "Lancet" endorses BECKMAN'S "TREATMENT"

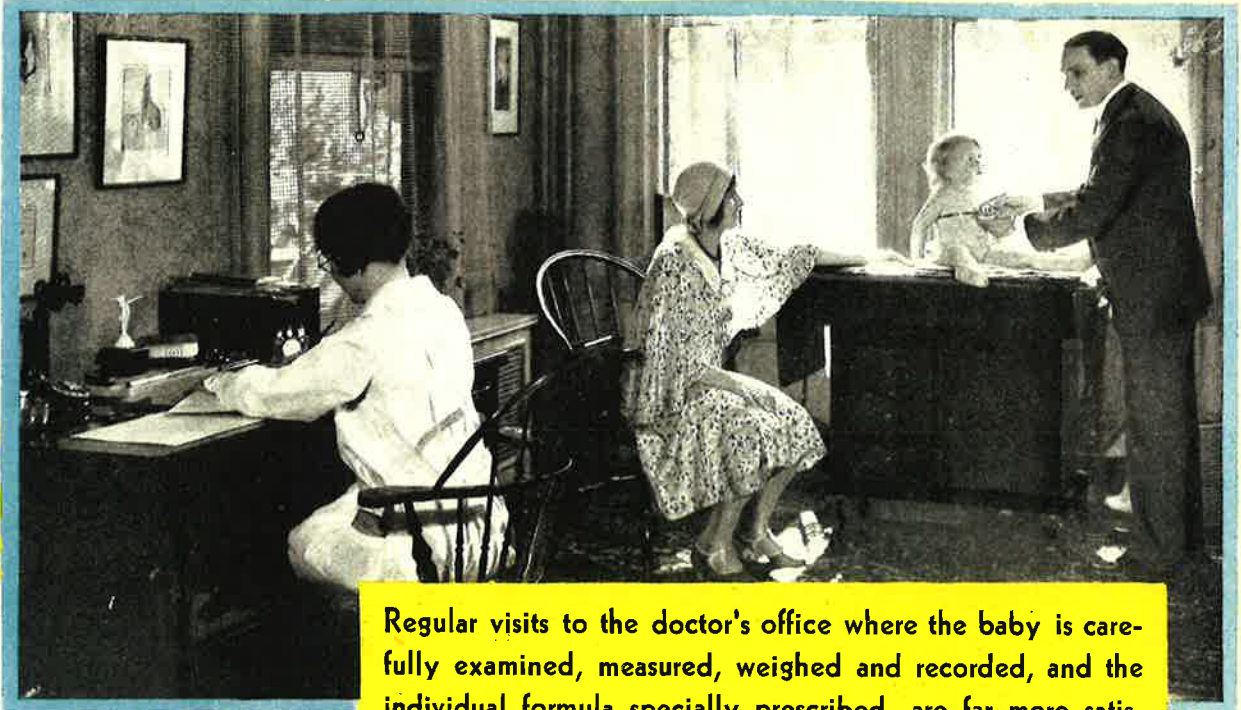

"**G**REAT as has been and is the need for the literature of applied pharmacology, this book is more than that. It is a most painstaking and exhaustive analysis of orthodox and putative therapeutics in medicine, written critically and giving details on technique and dosage.

"Nowhere in the book will it be found that the treatments discussed are independent of diagnosis properly made. This tribute should not be taken to imply that students will find here any rule-of-thumb index of treatment. Far from it; the book is one written by a tutor and not by a 'coach.' Two full pages, for instance, on the successful treatment of diabetes mellitus by myrtillin will certainly not be found to be lightly transferable to a daily prescription sheet, and the section on asthma will probably leave the average doctor wiser chiefly by his increased recognition of the darkness surrounding the subject. But, nevertheless, many refreshing passages should help him to increase the efficiency of his armamentarium in the treatment of haemoptysis, syphilis, chronic nephritis, herpes zoster, eczema, and a host of other diseases. This book or its equivalent should be in the hands of every physician, and *we have not yet come across its equivalent.*"

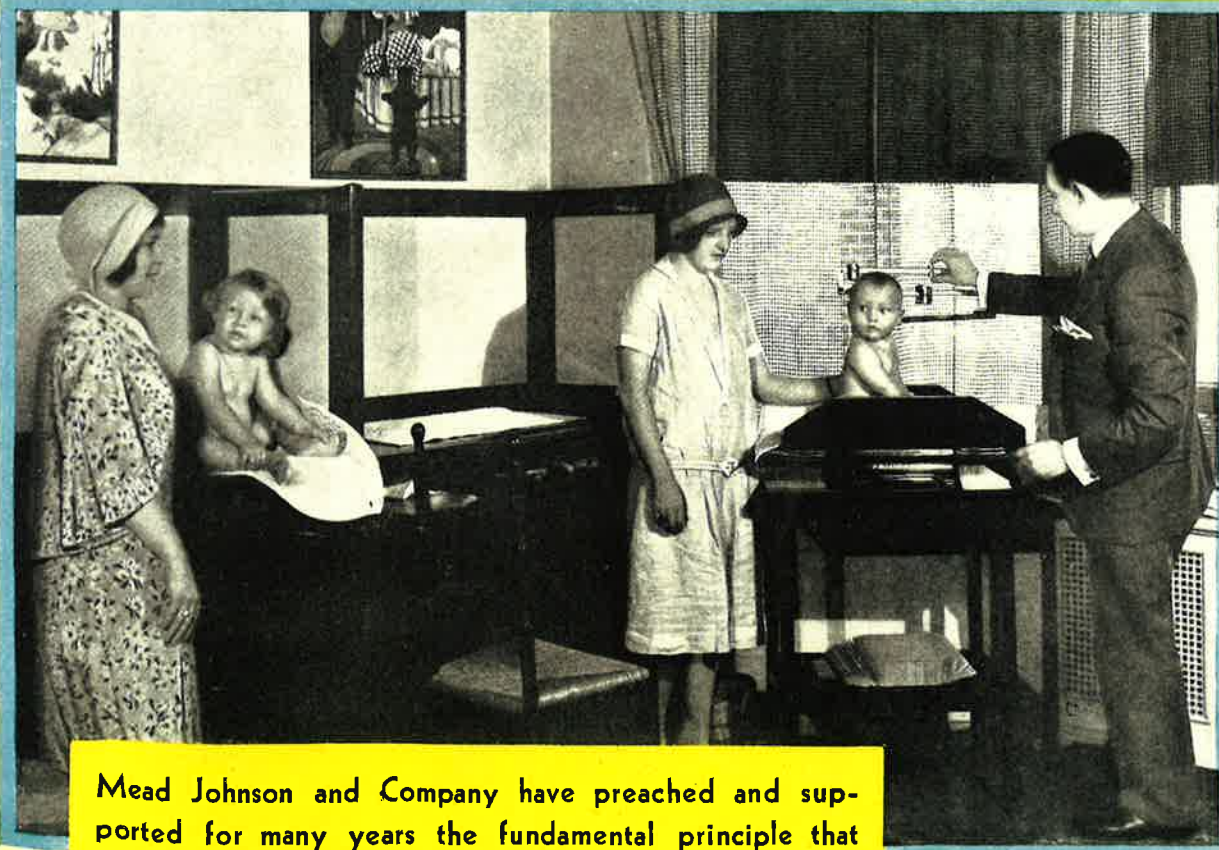

Octavo volume of 899 pages. By HARRY BECKMAN, M.D., Professor of Pharmacology at Marquette University, Milwaukee. Cloth, \$10.00 net

Other Important SAUNDERS BOOKS on Pages 3, 4, 5

PHYSICIANS' BABIES ARE BETTER BABIES

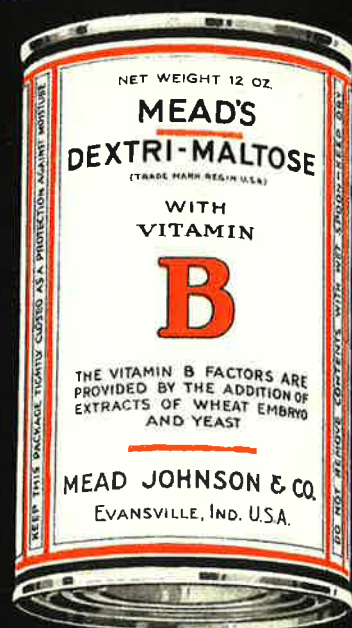

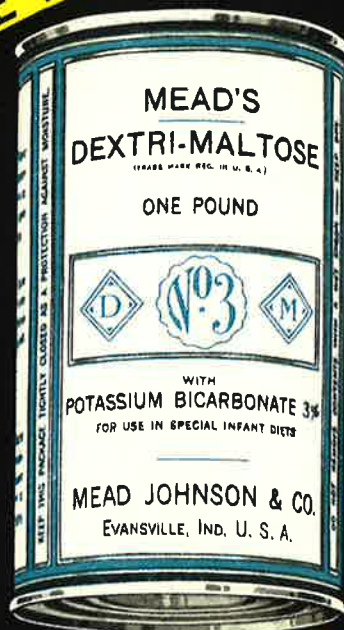

Regular visits to the doctor's office where the baby is carefully examined, measured, weighed and recorded, and the individual formula specially prescribed, are far more satisfactory than the mother's attempting to feed her baby without professional advice.

Mead Johnson and Company have preached and supported for many years the fundamental principle that "Physicians' Babies are Better Babies".

FRIGHT

far-fetched and foolish though it may seem to you, causes very *real* anguish to many of your patients. Children and nervous women especially may gag and positively suffer at the mere thought of a whole spoonful of unpleasant Cod Liver Oil.

Your prescription for White's Cod Liver Oil Concentrate is a revelation to these patients—

Just three little wafers—as good as candy—so that for children medicine-time becomes a treat.

And you can rely on their taking White's; getting the full Vitamin A and D potency of high-test oil regularly.

Nervousness and wayward irritability in children is often a definite indication for Cod Liver Oil. When you prescribe White's Cod Liver Oil Concentrate you assure the patient of no less than 250 units Vitamin A and 100 units Vitamin D in *each wafer*.

White's
Cod Liver Oil Concentrate

HEALTH PRODUCTS CORPORATION, NEWARK, N. J.

PREVENTS RICKETS AND SPASMOPHILIA

Ever since 1914, when S. M. A. was first developed as a diet compound adapted to breast milk, it has always contained enough cod-liver oil to make it anti-rachitic and anti-spasmophilic. The kind of food constituents and their correlation also contribute to prevent rickets and spasmophilia.

IN ADDITION S. M. A. HAS THESE FEATURES:

-  Only milk from tuberculin tested cows, from dairy farms that have fulfilled the sanitary requirements of the City of Cleveland Board of Health, is used as a basis for the production of S. M. A. 
-  No modification is necessary for normal full term infants. 
-  Resembles breast milk both physically and chemically. 
-  Simple for the mother to prepare. 
-  It gives excellent nutritional results in most cases, and these results are obtained more simply and more quickly. 

MAY WE SEND YOU SAMPLES?

S. M. A. was developed at the Babies and Childrens Hospital at Cleveland, and is produced by its permission exclusively by

Another Reason Why Breast Milk for babies is Best Milk

Recent investigations* indicate that breast milk contains a mysterious substance called lysozyme which has the power to dissolve air-borne and certain other adventitious bacteria that reach the infant's intestinal tract, this tract being sterile at birth.

Lysozyme also inhibits the growth of *B. coli* but has little effect on the desirable *B. bifidus* and allied types, and thus tends to stabilize the intestinal flora of the nursling.

No artificial feeding contains lysozyme. Only breast milk is blessed with this wise protection of Nature.

SYNTHETIC MILKS ARE NOT THE SAME AS BREAST MILK

For almost thirty years, Mead Johnson & Company have recognized and urged the use of breast milk. As a second choice—where breast milk cannot be reestablished—we recommend cow's-milk-water-Dextri-Maltose formulae. When artificial feeding must be used, this system, while it does not supply lysozyme, does make possible a practically sterile feeding.

You can pasteurize the milk, you can boil the water, and you know that Dextri-Maltose is practically sterile. Not all carbohydrates are in this class. As a result of long experience in rigid sanitary control, Dextri-Maltose is a *clean* product rather than a *cleaned* product.

The attitude of Mead Johnson & Company on the subject of synthetic substitutes for breast milk is in sharp contrast to the exaggerated claims of others that such synthetic milks are the equal of breast milk, to be used in every case. Mead Johnson & Company's Reolac is recommended only for traveling mothers and for complementing breast feedings in certain classes of cases where its use is quite defensible.

* Rosenthal, L. and Leberman, H.: The rôle of lysozyme in the development of the intestinal flora of the new-born infant. J. Inf. Dis., 48:226(1931). Copy of this paper and list of other bibliography available on request of Mead Johnson & Co.

Growth

In deciding the child's daily diet, specialists are careful to prescribe right combinations of foods so that what is lacking in one is supplied by another.

Young, growing bodies need plenty of heat and energy producing food. White bread supplies this particular need in easily digestible form.

Food substances fall into a number of general classes: proteins, vitamins, carbohydrates, fats and minerals. All these are necessary for the

normal growth and development of the human body. White bread, made with milk and yeast, is rich in proteins of high quality which facilitate the maintenance of nitrogen metabolism; it is rich in carbohydrates which supply heat and energy; spread with butter it contributes fat and, through the milk, provides vitamins and also calcium valuable for bone and teeth growth.

The food value of bread is beyond question.

As one of the key people who direct the food habits of the nation, you are interested in knowing all "The Facts About Bread and Its Rightful Place in the Diet." Under this title we have published a book of authentic statements by eminent physicians, scientists and educators. We will be glad to send you without charge a copy of this booklet.

Send

WANTED—OFFICE EDITOR TO TAKE CHARGE of medical department, familiar with medical literature, editing, proofreading, abstracting, manufacturing details. Address, with full particulars. Add. 6272 C, % AMA.

WANTED—RECENT GRADUATE WHO HAS COMPLETED a hospital internship for educational work; state qualifications and initial salary. Add. 6268 C, % AMA.

WANTED—MALE PHYSICIAN AND FEMALE PHYSICIAN in New England state hospital; must be graduate class A school, not over 40 years of age; excellent opportunity for instruction and experience in psychiatry; salary determined by experience. Add. 6321 C, % AMA.

WANTED—YOUNG CLASS A MAN INTERESTED in industrial health work to assist director of medical division of large organization; work is mainly administrative and includes considerable writing and public speaking; Chicago vicinity; full-time required. 470, Medical Bureau, Pittsfield Bldg., Chicago.

WANTED—CLASS A SCHOOL SINGLE MAN FROM 30 to 45, as assistant physician in middle west private mental hospital; psychiatric experience preferred; salary \$200 per month and maintenance; send photograph and credentials. Add. 6214 C, % AMA.

WANTED—A YOUNG MAN AS ASSISTANT PHYSICIAN upon the staff of mental hospital near Pittsburgh; must come well recommended; graduate of A-1 school; single preferred; good salary and good home accommodations. Add. 6224 C, % AMA.

WANTED—WELL TRAINED DERMATOLOGIST TO become associated with large group clinic; department is to be organized separate from the department of urology; group is moving into beautiful new building adjacent to its own hospital. 471, Medical Bureau, Pittsfield Bldg., Chicago.

INTERNS WANTED

The ★ signifies a hospital approved for internships and the +, approved for residencies in specialties by the Council on Medical Education and Hospitals of the A.M.A.

WANTED—TWO INTERNS FOR 115-BED HOSPITAL, ★ rotating service, beginning July 1st, 1930 and ending June 30, 1931; salary \$25 per month; hospital recognized by American College of Surgeons and American Medical Association. Apply to Medical Director, South Baltimore General Hospital, 1211 Light St., Baltimore, Md.

WANTED—FOR JULY 1—TWO INTERNS FOR general hospital; capacity will be 175 this summer, rotating service, complete new up to date surgical unit in course of construction; allowance \$50 monthly; hospital recognized by American College of Surgeons and Medical Association; apply superintendent; good opportunity for energetic young men. Add. 6261 D, % AMA.

WANTED—INTERNS—2 TO COMPLETE STAFF of 6 in 250-bed general hospital* in New England; well organized staff; full time radiologist, pathologist and physical therapy with adequate staffs; 40% charity service; service July 1 to June 30 rotating. Add. 6267 D, % AMA.

WANTED—INTERNS—GRADUATE CLASS A schools; one year rotating service, general hospital 155 beds, approved by Pennsylvania state board, under consideration by A. M. A.; \$25 month, maintenance; July 1, 1930. Apply intern committee, Mercy Hospital, Altoona, Pa.

WANTED—A 250-BED HOSPITAL*—ROTATING service including medicine, surgery, obstetrics and x-ray wants six interns; salary \$25 per month and maintenance with bonus of \$300 on completion of service; appointments to be made April 19, 1930. Address Dr. E. J. Stedon, Mt. Carmel Hospital, Columbus, O.

WANTED—APPLICATIONS FOR INTERNSHIPS— 12 months beginning July or August 1st; 160-bed general hospital, ★ rotating service; \$25 month and free maintenance with \$100 yearly bonus. Address Deaconess Hospital, St. Louis, Mo.

WANTED—INTERNS FOR YEAR BEGINNING JULY 1, 1930; rotating service; general hospital of 125 beds; compensation \$100 per month and maintenance. Apply Superintendent, Christian H. Buhl Hospital, Sharon, Pa.

WANTED—TWO JUNIOR INTERNS—ST. AGNES' Hospital, ★ Baltimore, Md.; rotating service, 225 beds, beginning July 1; apply at once. Dr. Emil Novak, Chairman Intern Committee.

WANTED—JULY 1—THREE MALE INTERNS— Class A school for hospital; rotating service; \$25 per month and maintenance. Decatur and Macon County Hospital, Decatur, Ill.

LOCATIONS WANTED

WANTED—SURGICAL LOCATION—BY EXPERIENCED general surgeon, aged 41; best of reasons for desiring a change; will furnish references from several doctors as to professional and social standing; will consider partnership or purchase; must be real surgical opening; could also supply technician. Add. 6271 E, % AMA.

LOCUM TENENS WANTED

WANTED—LOCUM TENENS—RECENT GRADUATE able to do ordinary surgery and general practice of medicine and obstetrics, to take practice of doctor who is going to Europe for May, June and July; good salary and all expenses paid; South Dakota city. Add. 6273 F, % AMA.

(Continued on next page)

"For the last seventeen years Variot has used homogenized and overheated (up to 227 F.) milk for the treatment of eczema in infants. The results were invariably good in both breast fed and artificially fed (cow's milk or proprietary foods) infants; ..."—J. A. M. A., July 20, 1929; Abstract, G. VARIOT, Archives de Medecine des Enfants, Paris, May, 1929

Eczema in infants yields to unsweetened evaporated milk

Many pediatricians have observed that infantile eczemas, even severe and chronic cases, often yield with surprising promptness when unsweetened evaporated milk is employed in the feeding formula. The attenuation of the milk proteins by the heat of sterilization and the diminution of the fat globules by homogenization render this milk acceptable to infants sensitized to raw, pasteurized, or boiled milk.

Unsweetened evaporated milk is readily assimilated, in "difficult feeding" cases as well as by normal,

healthy infants. The curd formed is soft and flocculent, resembling that formed by breast milk. Uniformity of composition and complete sterility further qualify this milk for general use in infant feeding.

A supply of unsweetened evaporated milk of highest quality is assured when Carnation Milk is prescribed. This milk is given every protection, from source to final hermetical sealing and sterilization, that scientific care and practical thoroughness can provide. ... Allow us to send data showing the value of this milk in infant feeding.

Everything Young Bodies Need

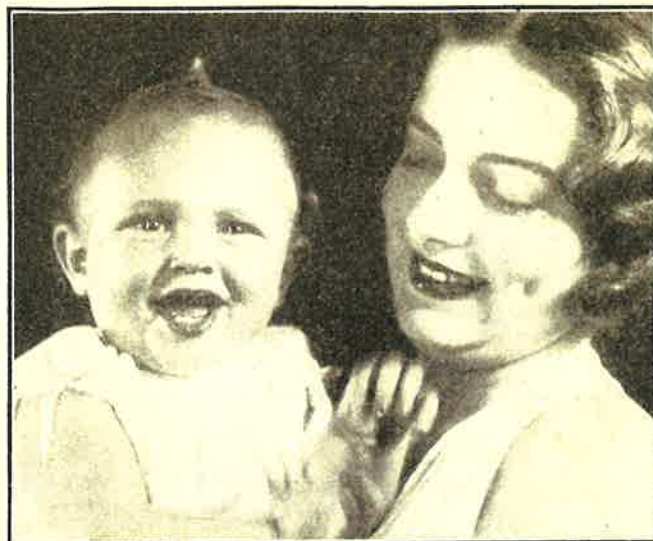

minerals

vitamins

proteins

carbohydrates

bran

OVER a period of thirty years, an increasing number of physicians and dieticians have prescribed Ralston for that all-important purpose of body building. They know it as a *whole wheat* cereal that provides all the nutritive elements of the whole wheat berry.

Ralston supplies minerals for strong bones and solid teeth . . . proteins for blood and muscles . . . carbohydrates for energy . . . bran roughage for normal, regular elimination . . . together with the natural, undisturbed vitamins of whole wheat.

Nothing is added to either alter the wholesome palatability of the wheat berry or change its true, sun-ripened color.

Wheat is the only element in Ralston . . . choice hard winter wheat for which we pay a premium because of its high protein content. When this wheat arrives at our Mills, it is thoroughly screened and cleaned . . . then ground. Then it is sterilized (but not pre-cooked)

by passing between heated coils . . . and packed by automatic machinery.

In addition to retaining the full mineral, protein and vitamin values of the endosperm and embryo, every precaution is taken to keep Ralston clean and sanitary.

If you have not prescribed Ralston Whole Wheat Cereal recently, or are not familiar with its deliciously palatable whole wheat flavor . . . won't you let us send you a package for your personal examination? Just fill in and mail the coupon below.

THE EYES SAY NO . . . or

THE EYES SAY YES ! ! !

EYES . . . pretty important to a convalescent's progress.

If dishes *look* good, they're more apt to be eaten with a relish.

If they don't . . . so often, back they go!

And that's why Jell-O is such a joy.

It looks good . . . is good. Easily assimilable, Jell-O is an ideal sick folks' dessert.

And Jell-O permits endless variety. Its five pure fruit flavors make even *plain* Jell-O dishes varied. And then there are all sorts of other ways—simple ways—to make Jell-O seem different and new! Whip it. Top it with cream, fruit, or a sauce. Mold it with fruit in it. Jell-O can appear often, without fear of monotony.

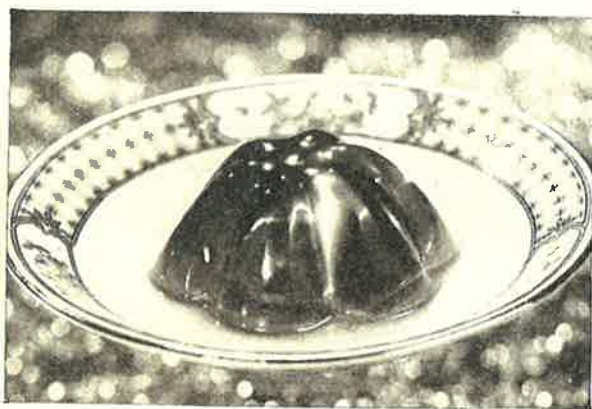

Every package of Jell-O is sealed by a special process, so that none of that fruity aroma is lost.

JELL-O

Degenerative Diseases ...and your motor car!

POSSIBLY you are one of that large group of physicians who turn in their cars each year.

For naturally you can't afford to own a car after it falls a victim to the automotive equivalent of nephritis or hardening of the arteries. Yet that practice is expensive—and unnecessary.

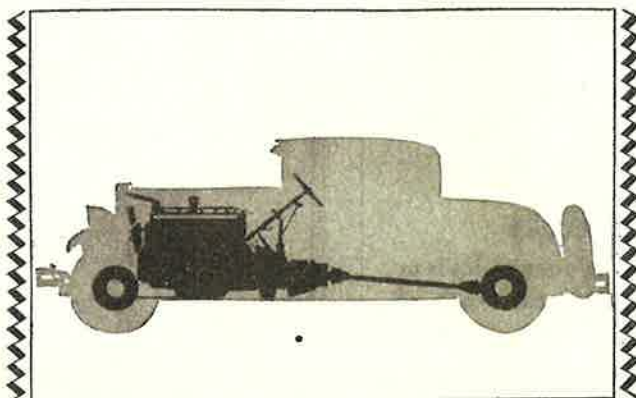

GOOD—FOR 100,000 MILES
Without tying up any more capital than you now do, you can own a car that is good for 100,000 miles. That car is Reo.

Reo springs are so sturdy—Reo axles so tough—that they can stand a test equivalent to driving a Reo off a 4-foot drop at 60 miles an hour. Reo pays 10% to 25% more for parts so that they can stand a strain 50% to 100% greater than the roughest service will ever place upon them.

In fact, the most recent investigation—an impartial analysis based on government registration figures—shows Reo to be the longest-lived of any car of American origin and manufacture, regardless of price.

SPEED—AND SAFETY

You need a fast car—and a safe one. Reo will climb from nothing to 70

miles an hour in 26 seconds. And Reo's brakes can stop you just as swiftly. They'll stop you in half the distance the strictest traffic laws require—yet without skidding, without side-sway, so perfectly are those brakes equalized. They stay equalized, too. And wet weather can't affect them.

And Reo's new Silent-Second Transmission, now available in the Reo Flying Cloud Model 20 and 25, will be a godsend. It's as silent as the ordinary high. You can do 40 miles an hour in second. You can shift back from high to second at 40—and you can shift from second to high at any speed. Only a motorcycle can get through traffic faster.

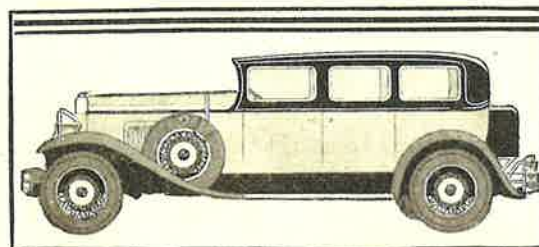

You need a good-looking car. Reo has the aristocratic lines you usually find only in the most expensive cars. Nothing extreme about Reo—no

radical yearly changes. Four years from now your Reo will still command respectful attention.

ECONOMY— REAL ECONOMY

And on top of all that, Reo is an economical car. It costs you no more than the cars you turn in frequently—and it saves you the heavy depreciation loss you suffer each time. If you own an expensive make, the Reo Flying Cloud gives you fine-car length of service—for half the investment and without the excessive upkeep.

Your Reo dealer will gladly arrange a demonstration—with the understanding that professional demands may suddenly interfere. Get in touch with him today.

The REO FLYING CLOUD MODEL 25 SPORT SEDAN, Equipped with the Reo Silent-Second Transmission. Reo prices range from \$1195 to \$1945, f.o.b. Lansing, Mich.

White winters . . . never come to this ISLAND of HEALTH

Bright, sunshiny days . . . brisk, tangy evenings . . . invigorating all outdoors . . . this is winter at Victoria, B. C., garden spot on Vancouver Island for rest and recuperation.

In detail, Victoria's climate runs parallel to the climatic optimum:

	Optimum	Victoria
Moderate temperature variation.	40° F. winter to 60° F. summer	39° F. January to 60° F. July (for the past 42 years)
Hours of brilliant sunshine.	1,786 hours a year	2,176 hours a year (for the past 15 years)
Rainfall.	27 inches a year	27.27 inches a year (for the past 42 years)

With this ideal climate, Victoria combines a complete change of scene . . . a community in a gorgeous setting of luxurious gardens, well-kept lawns, and sun-sparkling sea. And, of course, every sport

facility . . . including great winter-golf on two championship courses.

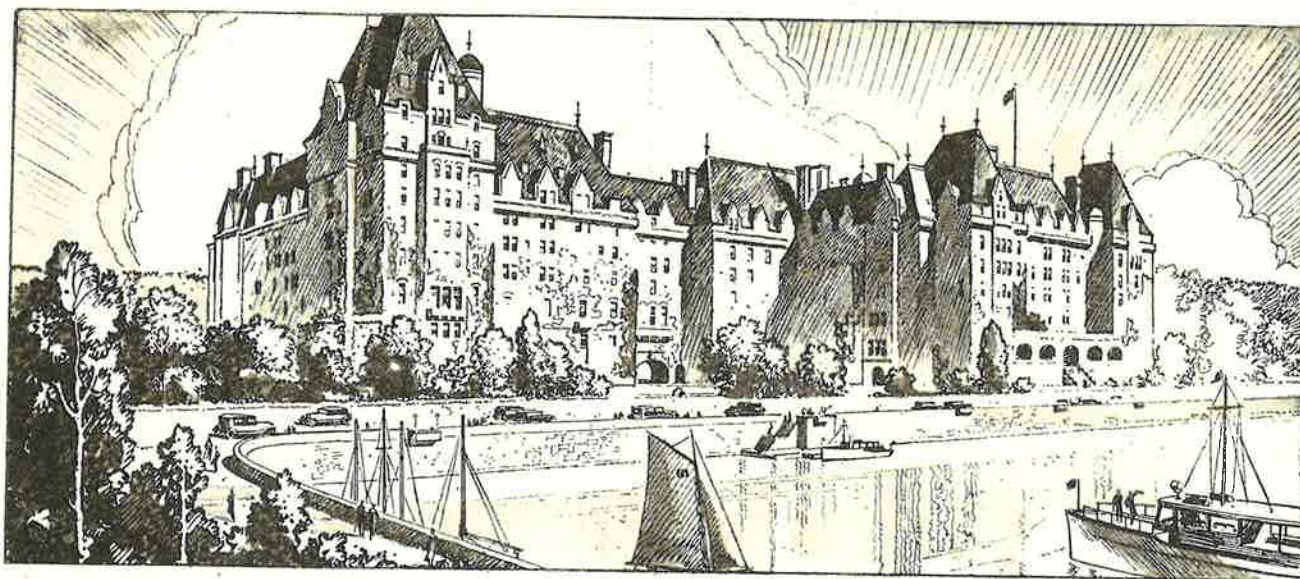

Outdoor advantages, every one, that hasten return to robust health.

Within doors at The Empress, Canadian Pacific's baronial hotel . . . a charming old-English home, courteous service, a zestful cuisine that can cater to any prescribed diet.

All these factors, so necessary to recuperation of your patients, you can offer by prescribing Victoria. Moreover, with two fully-equipped modern hospitals and 65 resident doctors, Victoria is ready in any emergency of relapse.

Why not begin prescribing Victoria's "Island of Health" to your patients who are past the crisis?

For information regarding special weekly rates and for reservations, address Manager of Hotel.

LISTEN IN! Canadian Pacific Broadcasts. Sunday, 4:15 EST: The Musical Crusaders. Programme produced in Canada. WJZ and associated NBC stations.

"Do you see what happened, Johnny?"

Johnny was playing baseball and hurt his arm. He is a good sport. Never a whimper when you applied splint and bandages. He gritted his teeth and tried a grin. Not a very good grin, maybe, but he tried.

But tomorrow he has to see you again—and the next day—and the next. Good sport or not, natural restlessness of the child does not make things easy. He chafes at an arm in a sling! But take him into your confidence, explain what happened, what you are doing, even why, and instantly you have caught his interest and received his cooperation. The irksome injury suddenly becomes a fascinating subject of conversation.

X-ray, because of the tangible proof it produces, appeals tremendously to Johnny. And not to him alone. His parents will appreciate more than ever the exact, scientific care you applied to the management of this case. So put your X-ray equipment to work, not in its diagnostic and therapeutic sense only, but in the peculiar ability it possesses of creating confidence and full recognition of your professional skill.

The apparatus illustrated is the famous American TripleX Unit, a highly efficient self-contained X-Ray plant for Potter-Bucky Radiography and Vertical Fluoroscopy.

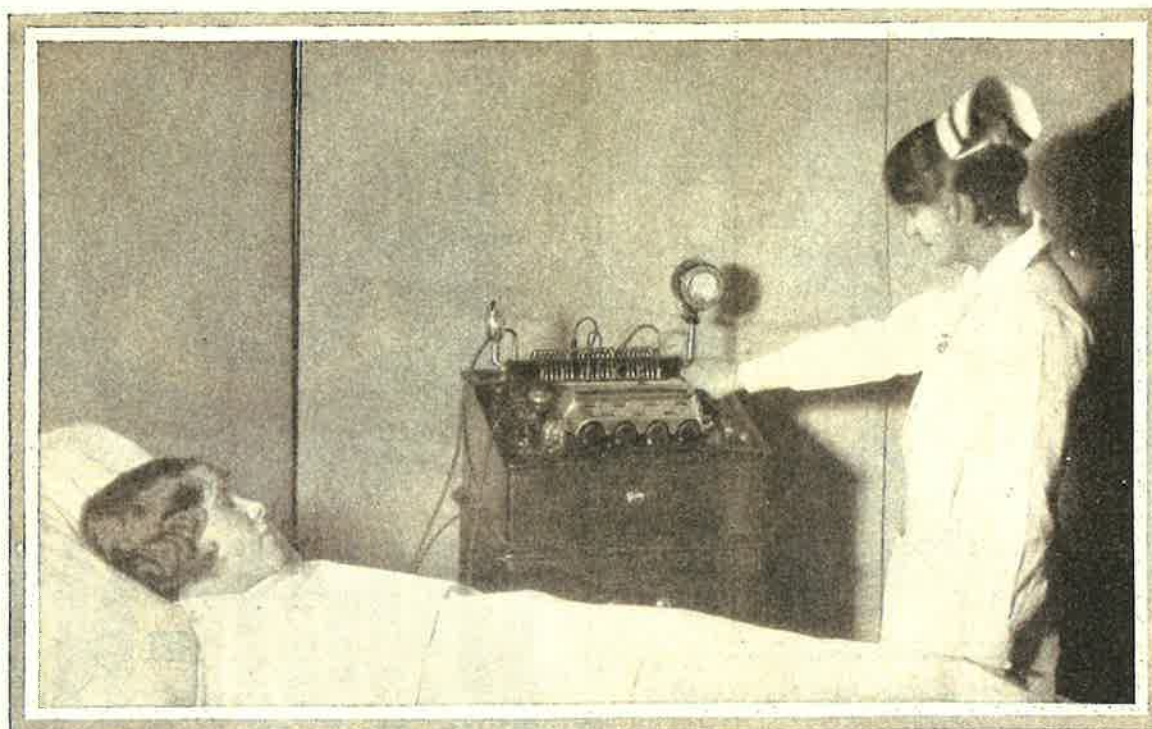

Should you be without adequate X-ray Apparatus at present, because of the impression that it entails a great investment, demands too much floor space or requires specialized skill, we urge you to mail the coupon below. The literature we shall send you will—we believe—clearly and convincingly answer all these questions.

AMERICAN X-RAY CORPORATION

American X-Ray Corp., 707 W. Lake St., Chicago, Ill.

An Effective Ally in the Treatment of Pneumonia

Anything short of major calibre in a diathermy machine for the treatment of pneumonia will prove disappointing. The Victor Vario-Frequency Diathermy Apparatus is designed and built specifically to the requirements. It has, first, the necessary capacity to create the desired physiological effects within the heaviest part of the body; secondly, a refinement of control and selectivity unprecedented in high frequency apparatus.

In the above illustration the apparatus proper is shown mounted on a floor cabinet, from which it may be lifted and conveniently taken in your auto to the patient's home.

A REPORT from the Department of Physiotherapy of a well-known New York hospital, dealing with diathermy in pneumonia and its sequelae, states as follows:

"As a rule diathermy is indicated in acute pneumonia, especially so when the symptoms are becoming or already are alarming: the temperature is high, the patient is delirious, the pulse is extremely rapid, cyanosis is deep, the respiration rate is high, the breathing is very shallow, and the cough remains unproductive. Not infrequently in a pneumonia case with such alarming symptoms, after a few diathermy treatments an entire change of the picture takes place: cyanosis lessens, respiration becomes deeper, the quality of pulse improves, the rate decreases, the

temperature is lowered, and the cough becomes productive. Auricular fibrillation that develops occasionally in similar pneumonias or other types of pneumonia where the toxemia is great, has been changed to a perfect normal rhythm after a few diathermy treatments."

You will value diathermy as an ally in your battles with pneumonia at this season, aside from the satisfaction derived from having utilized every proved therapeutic measure that present day medical science offers.

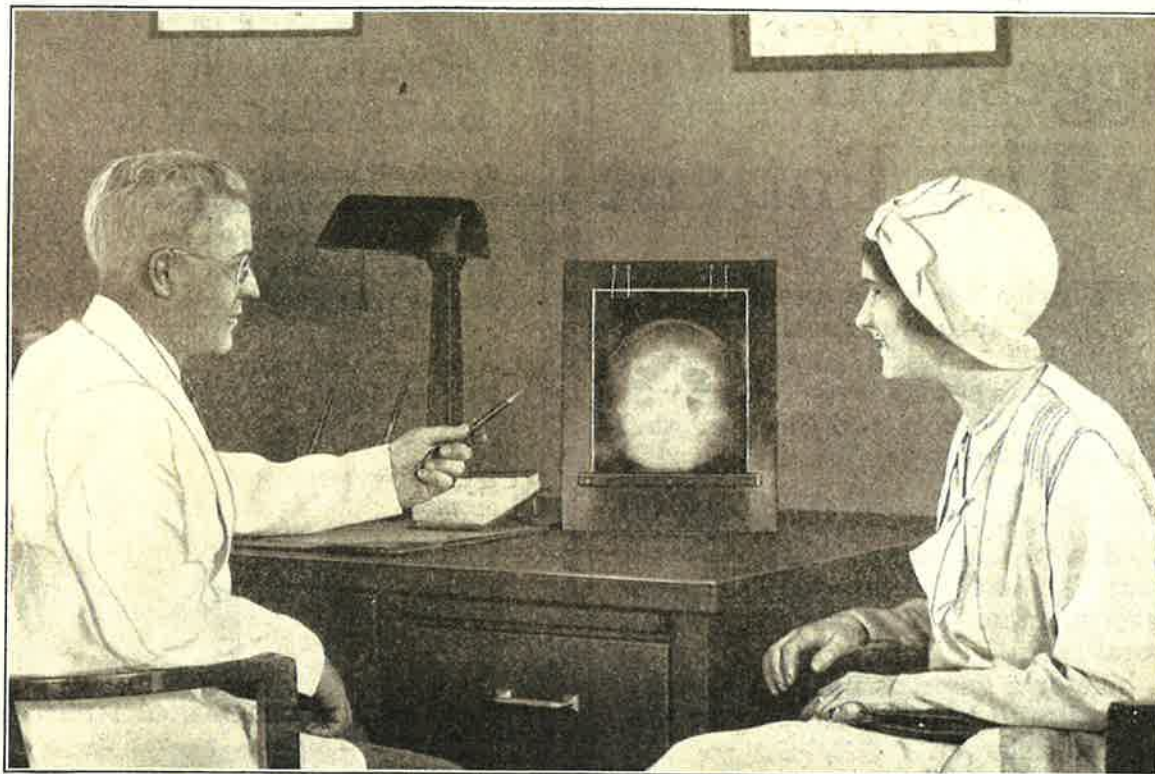

A reprint in full of the article above quoted, also reprints of other articles on this subject, will be sent on request.

Curves are only half-way back to normal!

Curves are in again. But not full, normal womanly curves. Fashion has gone only half-way. The vogue for slenderness, though modified, still prevails.

So thousands of women will *still* risk wrecking their health to achieve boyish lines. Thousands of women will *still* persist in unwise dieting. Thousands of women will still adhere to the dangerous "toast-and-coffee" breakfast. . . .

And, no matter how strongly you insist on the need for a *sufficient* breakfast—they won't heed.

Perhaps Grape-Nuts can be of service in such cases. For Grape-Nuts is delicious—a temptation to the morning appetite. Yet it is not a "heavy" food. Only a few tablespoonfuls of Grape-Nuts, with whole milk or cream, will supply a variety of vital elements that will make even the small breakfast a safe, nourishing one.

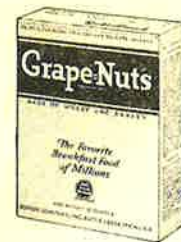

Grape-Nuts is made of wheat and malted barley, and it contributes to the body phosphorus, iron, proteins, and the important vitamin-B. It also gives a

plentiful supply of carbohydrates, a large part of which have been converted to easily digested dextrins by a special baking process.

Grape-Nuts is crisp and crunchy, too. It requires thorough chewing, so valuable for the health of teeth and gums. Grape-Nuts, a product of General Foods Corporation, is sold by grocers everywhere.

Analysis of Grape-Nuts

Moisture.....	2.1%
Ash.....	2.7%

Canned Vegetables

—so rich in vitamins
—are more appetizing
when Seasoned

with Sugar

THIS is one of the advertisements of The Sugar Institute, appearing in newspapers throughout the country. In order to keep the statements in accord with modern medical practice, they have been submitted to and approved by some of the leading authorities in the field of human nutrition in the United States.

IF you could watch and study the great canning companies at work you would make these amazing discoveries. First, the vegetables chosen are as fine as any fresh vegetables that ever came into your kitchen. Second, the scientific methods of cooking and packing conserve more of the vitamins and minerals than you can on your home range.

To get the utmost from these pure, wholesome canned vegetables, heat them rather than boil them. *They don't need to be re-cooked.* Then season to taste and serve.

A dash of sugar to a pinch of salt is an ideal seasoning for all vegetables — canned or fresh. The sugar in this mixture heightens

their flavor and makes them more enjoyable. And food that pleases the taste promotes the flow of gastric juices.

Doctors and dietitians approve the use of sugar as a flavor in the preparation of food for children and adults. For sugar makes most foods, which are carriers of roughage, vitamins and minerals, *more* enjoyable. Good food promotes good health. The Sugar Institute, 129 Front Street, New York.

☛ *"Most foods are more delicious and nourishing with Sugar"*

SPINACH *your patients will eat*

★ || Van Camp's Puréed Spinach will
be liked—and eaten with zest. Try
it yourself and see how good it is. ★ ||

Good dietetically
...and good to eat

LABORATORY control in producing Van Camp's Puréed Vegetables—for SMOOTH DIETS and Infant Feeding—means far more than writing recipes and instructions.

Raw products are purchased by Van Camp's under specifications prepared by a staff of chemists who have many years of organized study of Van Camp's business to reinforce the standardized knowledge of the subject. Processing of all constituents is explored with equal thoroughness. Every daily repetition of each process from purchasing to shipment is verified by laboratory check. A sample of every finished "run" is filed in the laboratory to verify the result of this laboratory control.

When prescribing smooth diets, or infant

CARROTS with Puréed Tomatoes and Beef Broth, MIXED VEGETABLES with Beef Broth, TOMATOES, SPINACH, PEAS.

GEORGE A. FISHER, Sc. D., Director of Research and Control Laboratories with twenty-five graduate chemists and a staff of assistants, has every modern laboratory facility in each of Van Camp's sixteen plants for food research and production control.

diets to supplement milk, the physician may be sure of maximum nutrition in Van Camp's Puréed Vegetables. Controlled cooking processes insure maximum preservation of vitamin content, mineral salts and other food components which deteriorate in home cooking methods. When Van Camp's Puréed Vegetables are prescribed for special diets, they are available wherever the patient may be, materially favoring strict compliance with instructions. You can readily test the appetizing appeal of all these Van Camp Puréed Vegetables yourself. Just warm, and serve as a vegetable side dish—or use for soups, soufflés, etc.

*We will be pleased to send samples to interested physicians, hospitals, nurses, or dietitians.

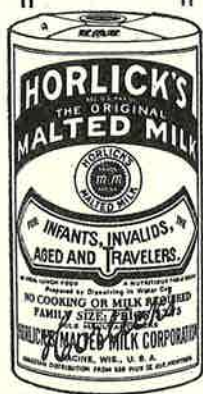

For Sleeplessness

Nervous troubles—especially insomnia—are often relieved by the use of Horlick's Malted Milk (hot) at bedtime.

Try this simple method—

Horlick's sets in action a gentle digestive process which is in itself soothing. Nourished and warmed, the patient is soon fast asleep. And while asleep, the abundant nutriment in Horlick's acts to build up the system.

Following operations, "Horlick's" is an excellent vehicle for administering sedatives and hypnotics

COLDS AND INFLUENZA

Build up resistance to winter ailments through the use of Horlick's Malted Milk—also a nourishing diet in convalescence

When other foods fail to be assimilated in fevers or in other wasting diseases, physicians are reminded of the remarkably nourishing, sustaining and invigorating qualities of Horlick's, the Original Malted Milk.

Its quickly assimilable nutrients, derived from fresh, full-cream milk and extracts of malted barley and wheat, give it a decided advantage over other foods. It nourishes the body and stimulates the appetite without imposing a digestive burden upon the patient.

Always available in hermetically-sealed glass jars. Requires no cooking—ready for use at any time, day or night.

In prescribing Malted Milk, please specify "Horlick's" in order that your patients may obtain the reliable product. It is economy to buy the best.

May we send you a supply of samples for professional use? The accompanying coupon will bring them promptly with interesting literature describing the many uses of Horlick's Malted Milk. Address HORLICK'S MALTED MILK CORPORATION, Racine, Wis.

Doctor, may I send your wife

a Free bottle of Hires Extract?
—enough to make

40 BOTTLES OF HIRES ROOT BEER

I want you and your family to become acquainted with the beverage we've been making for over 50 years.

You'll like its delicious flavor, its distinctive taste. You'll appreciate its ingredients—it contains the percolated juices of roots, herbs, barks and berries. And it is absolutely free of habit-forming drugs, artificial color or flavor.

Hires Root Beer is so easy to make—so economical. It costs but 1½ cents a bottle, compared to the usual prices you pay for other fine beverages. A saving averaging 90%.

More Hires Root Beer is being made today than ever before—its popularity is ever increasing.

Will you and your family please get acquainted with Hires Root

Beer and compare its merits with any other beverages used in your home?

For a free, full size bottle of Hires Extract merely mail the coupon below. Kindly give home address, rather than office.

C. E. Hires

President,
The Charles E. Hires Company,
Philadelphia

The Charles E. Hires Company, Dept. M
Philadelphia, Pa. 5-2-30

Kindly send free bottle of Hires Extract.

14,393 DOCTORS

have mailed the coupon below
to me—won't YOU, please?

I'VE INVITED DOCTORS, through the Medical press, to give their families an opportunity to know Hires Root Beer. To test its delicious flavor. To compare it with other beverages. To realize it costs but 1½c a bottle to make—compared to the usual price of 10c to 20c for other bottled beverages.

My invitation has been quickly and widely accepted. But I would be glad to send out several times as many full size bottles of Hires Root Beer Extract.

Your wife will find it so easy to make 40 bottles of Hires Root Beer—she just adds water, sugar and yeast to the bottle of our Extract.

Once you and your family and friends try Hires Root Beer (or our newer offering Hires Ginger Beer) you'll all appreciate the superiority of these home-made beverages—so delicious, so pure, so economical.

Hires Root Beer Extract contains the percolated juice of roots, herbs, bark and berries. It is utterly pure—free from habit-forming drugs, artificial color and flavor.

I invite every doctor who reads this magazine to tear out the coupon below and mail it to me.

The Charles E. Hires Company, Dept. M,

WHEN A DIABETIC SAYS:

*"What can I eat
that tastes good?"*

One of the problems
in diabetes is to keep
the patient diet-happy!
And Knox Sparkling Gel-
atine can be of real service.

As you will note in the recipe
below, Knox Gelatine com-
bines perfectly with the foods
prescribed for the diabetic diet. It
makes dishes that are appetizing and
different to the eye and the taste. It
supplies the diet variety that satisfies
the patient's appetite and it supplies the
food-bulk that the patient's hunger craves.

People suffering from diabetes really enjoy
gelatine dishes—and they *can* enjoy them if they
have our diabetic recipes prepared by one of the
country's recognized dietitians. Remember, Knox
Gelatine is free from *sugar*.

KNOX *is the*
real **GELATINE**
Contains No Sugar

WINTER SALAD (Six Servings)

	Grams	Prot.	Fat	Carb.	Cal.
2 teaspoons Knox Sparkling Gelatine	4.5	4
1/4 cup cold water
1/4 cup hot water
1/2 teaspoon salt
1/2 cup vinegar
1 1/2 cups grated cheese	150	43	54
1/2 cup chopped stuffed olives	70	1	19	8
1/2 cup chopped celery	60	1	2
1/2 cup chopped green pepper	25	1
1/2 cup cream, whipped	75	2	30	2
Total	51	103	13	1183	
One serving	8.5	17	2	197	

Soak gelatine in cold water. Bring water and salt to boil and dissolve gelatine in it. Add vinegar and set aside to chill. When nearly set, beat until frothy, fold in cheese, olives, celery, pepper and whipped cream. Turn into molds and chill until firm. Unmold on lettuce leaf and serve.

SPINACH SALAD (Six Servings)

	Grams	Prot.	Fat	Carb.	Cal.
1 1/2 tablespoons Knox Sparkling Gelatine	10	9
1/4 cup cold water
1 1/4 cups boiling water
2 tablespoons lemon juice	20	2
1/2 teaspoon salt
1 1/2 cups cooked spinach, chopped	300	6	7
2 hard cooked eggs	100	13	10.5
Total	28	10.5	9	242.5	
One serving	5	2	1.5	40	

Soak gelatine in cold water and dissolve in boiling water. Add lemon juice, salt, strain and chill. When nearly set, stir in chopped spinach, mold and chill until firm. Serve on lettuce hearts or tender chicory leaves and garnish with hard cooked egg, cut lengthwise in sixths and sprinkled with paprika. Serve with mayonnaise.

If you agree that recipes like the ones on this page will be helpful in your diabetic practice, write for our complete Diabetic Recipe Book—it contains dozens of valuable recommendations. We shall be glad to mail you as many copies as you desire. Knox Gelatine Laboratories, 405 Knox Ave., Johnstown, N. Y.

New facts about KLEENEX every doctor should know

Announcing results of bacteriological tests on handkerchiefs used during colds—of utmost significance to every physician

PROFESSIONAL men recognize—far beyond the comprehension of the layman—the significance of the common cold which causes more industrial loss than any other ailment . . . and is a contributing cause to far more serious secondary diseases.

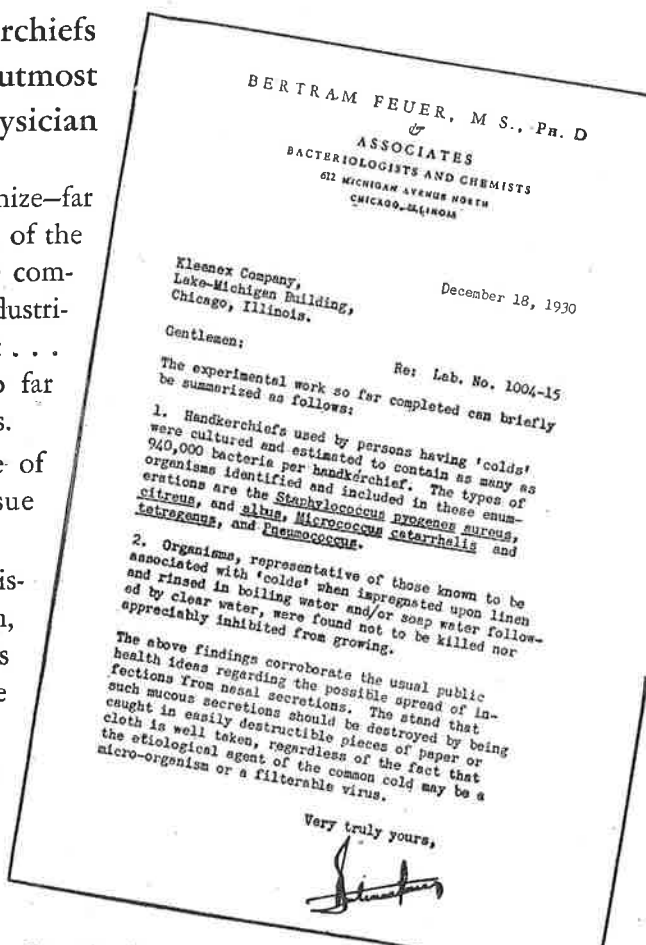

You, then, know the value of Kleenex—the disposable tissue handkerchief.

You know the advisability of discarding a handkerchief—which, used during colds, may contain as high as 940,000 germs of the types associated with colds!

Almost 3,000 eye, ear, nose and throat specialists have asked for samples of Kleenex. Kleenex is used today in the practice of hundreds of reputable physicians, who are urging patients to use this safer handkerchief.

May we send you a sample package of Kleenex, specially packaged for professional men? The coupon will bring it.

Dr. Feuer, who supervised bacteriological experimental work on Kleenex, was formerly of Northwestern University Medical School.

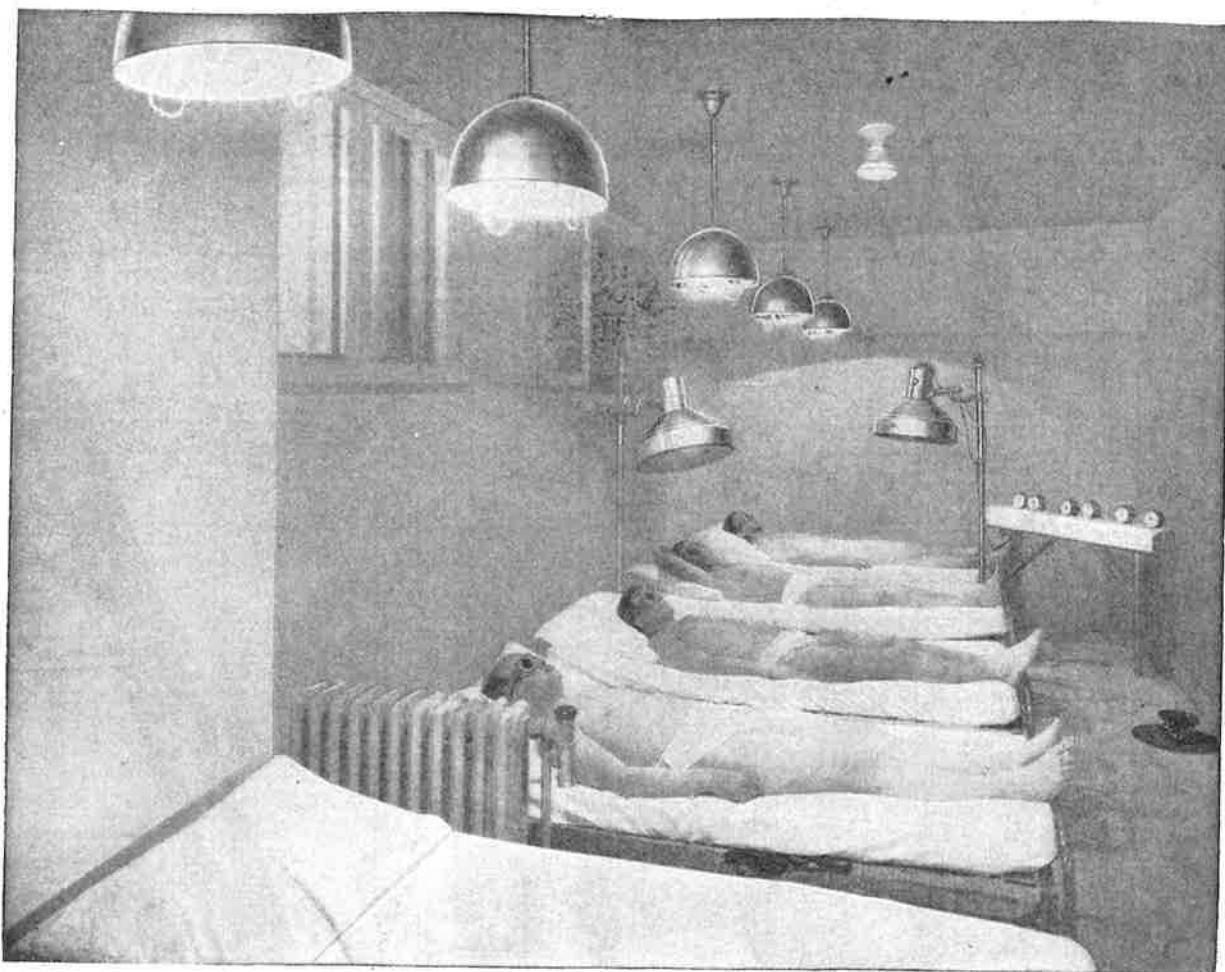

Kleenex Company AM-1
Lake Michigan Building, Chicago, Illinois
Please send me a package of Kleenex for professional use. (Print name plainly.)

For Busy Hospitals . . . the Hanovia Super Alpine Sun Lamp

THE necessity for treating several patients simultaneously has caused hundreds of hospitals and sanitoriums to adopt Hanovia Solarium installations for the rapid and efficient administration of ultraviolet Quartz mercury light.

In his own office the physician finds that because Hanovia Super Alpine Sun Lamps yield the maximum intensity of ultraviolet—with instant operation and no attention, replacements or adjustments—he can treat more patients in less time.

THE GENERAL ELECTRIC

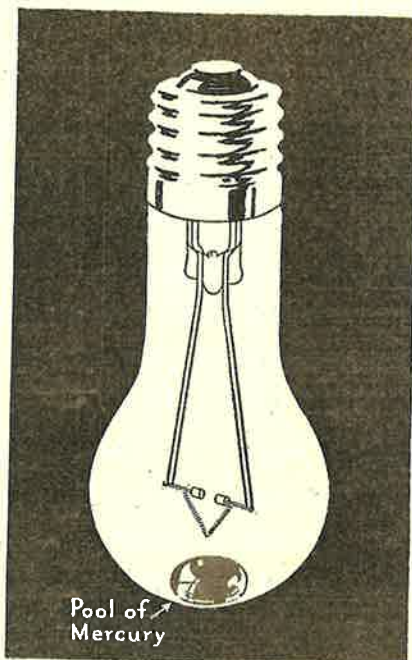

SUNLIGHT MAZDA LAMP

is safe for you to prescribe

WHILE the G. E. Sunlight MAZDA Lamp is not advertised to the public for treatment purposes, it is *safe* for physicians to prescribe because its radiation is essentially free from short wave ultra-violet. The special glass of the bulb, like the atmosphere in Nature, filters out practically all radiation below 2800 A°.

The Sunlight MAZDA Lamp is *safe* for you to prescribe because it offers no more danger of over-exposure than does summer sunlight itself. The table illustrated shows the approximate length of time which persons of varying sensitivity of skin require under a fixture utilizing the G. E. Sunlight MAZDA Lamp operated at 115 volts to obtain a *good* erythema on an untanned portion of the body. (By "good" is meant a considerable reddening of the skin without subsequent peeling).

Simplicity also helps to make the Sunlight MAZDA Lamp *safe* for home use. There is no mechanism with which to fuss. The lamp gives off no smoke nor odor; and makes no noise. The sources of ultra-violet energy, incandescent tungsten and mer-

The Sunlight MAZDA Lamp will not fit or operate in the ordinary lamp socket. It must be used in the G. E. Sunlamp or in special equipment made by G. E. and other manufacturers.

MINUTES OF EXPOSURE FOR GOOD ERYTHEMA AT VARIOUS DISTANCES FROM G. E. SUNLIGHT MAZDA LAMP

	1½ Feet	2½ Feet	4 Feet	5 Feet
<i>Persons particularly sensitive to sunburn or tan</i>	5	11	27	39
<i>Persons of average sensitivity to sunburn or tan</i>	9	20	49	71
<i>Persons of less than average sensitivity to sunburn or tan</i>	15	33	81	117

cury vapor, are sealed within the special glass bulb. Thus the G. E. Sunlight MAZDA Lamp greatly resembles an ordinary MAZDA Lamp in appearance and operation.

Backed by the greatest name in electricity and sold in accordance with the requirements of the Council

of Physical Therapy of the American Medical Association, the G. E. Sunlight MAZDA Lamp is now being prescribed by physicians as a source of safe, effective ultra-violet for general health maintenance, as well as for specific treatment.

Some physicians not only prescribe the use of the Sunlight MAZDA Lamp to their patients but they also use it in their own homes that they and their families may enjoy the benefits of regular health-maintaining ultra-violet, economically.

An interesting booklet on the use of ultra-violet in the home and other helpful information will be sent without charge to doctors who request it. Write or use the coupon.

Physicians who desire a more complete and more scientific picture of ultra-violet for health and vision, will find it in "Artificial Sunlight" by M. Luckiesh, D. Sc. This book may be secured from the publishers, D. Van Nostrand Co., Inc., New York City, for \$3.75.

INCANDESCENT LAMP DEPARTMENT OF GENERAL ELECTRIC CO., NELA PARK, CLEVELAND, OHIO

or the home.
Automatic cut-off pre-
vents over-exposure.

by choice of carbons. Eveready Sunshine Carbons give close duplication of natural sunlight. Eveready Therapeutic Carbons give intensified ultra-violet or infra-red radiation, according to the type selected. Removable panels of special glass, with permanent ultra-violet transmitting characteristics, limit radiation to rays found in summer sunlight. When these panels are removed the total output of therapeutic ultra-violet, including rays shorter than 2900 AU, is increased about fourfold.

Write for complete information.

Opportunity of a lifetime to purchase these sets at a give-away price. Every instrument guaranteed perfect in every respect. Shipped C. O. D., with privilege of inspection before paying the express man. No obligation on your part. If not 100% satisfied return at our expense.

General Operating Set . . \$32.50 F. O. B. Chicago

92 Units. Original Cost to U. S. Government, \$147.68

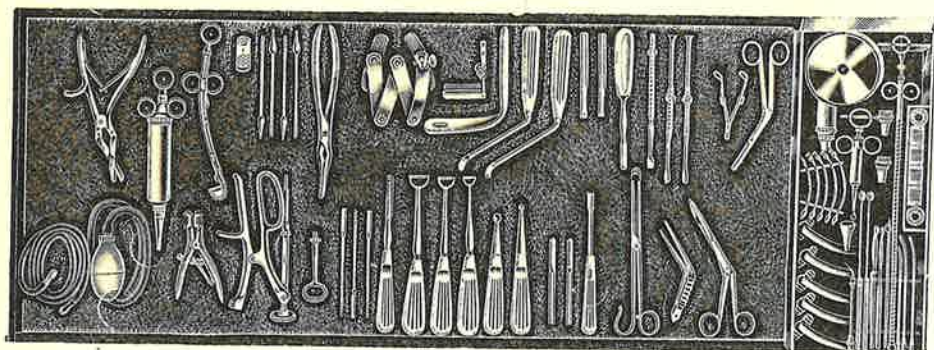

HERE IS WHAT EACH SET CONTAINS:

- 1 Mallet, hardwood.
- 1 Forceps, rongeur and bone holding.
- 1 Saw, amputation, 9-inch blade.
- 1 Nickel-plated hypodermic case containing:
 - 1 All-metal operating syringe, capacity 3 drams.
 - 1 Aspirating stop cock.
 - 1 Aspirating trocar.
 - 1 Hypo needle.
 - 1 Antitoxin needle.
 - 1 Aspirating needle, medium.
- 1 Nickel-plated suture needle case.
- 1 Sutures, horsehair, 100 strands in coil.
- 1 Needle sutures, 1 dozen assorted.
- 1 Aseptic silk ligations, Nos. 4, 7 and 10 (1 each in package).
- 1 Forceps, sequester, curved on flat bone holding.
- 1 Forceps, curved bone gouging, with spring.
- 1 Trophine, DeVilbiss.
- 1 Scissors, heavy blunt.
- 1 Scissors, bandage.
- 2 Retractors, double ends nested.
- 1 Forceps, bone cutting, flat blade.
- 1 Forceps, bone gouging, without spring.

- 1 Hernia needle, blunt.
- 1 Forceps, clamp compression, Pean's.
- 3 Forceps, haemostatic, straight, small jaw.
- 1 Scissors, curved.
- 1 Gag, mouth, Denhardt.
- 1 Chisel.
- 1 Enucleator, Young's.
- 1 Curette, mastoid.
- 1 Dissector and raspator.
- 2 Bone spatulas.
- 1 Forceps, clamp 6-inch.
- 1 Needle holder.
- 6 Haemostatic forceps, straight.
- 1 Forceps, tissue.
- 1 Forceps, dressing.
- 1 Scissors, dressing, blunt ends.
- 1 Scissors, dressing, pointed ends.
- 1 Gouge.
- 2 Clamps, compression, intestinal, Murphy.
- 1 Director, grooved, and aneurism needle.
- 3 Forceps, dissecting.
- 1 Tongue depressor, folding.
- 2 Forceps, Jones, 2-inch bite.

- 1 Probe and director, straight.
- 1 Probe and director, curved on straight.
- 2 Forceps, mouse tooth.
- 1 Nickel-plated case containing:
 - 1 Razor.
 - 1 Eye hook and spoon.
 - 1 Trocar.
 - 1 Catlin knife.
 - 1 Eye spud.
 - 4 Scalpels, 1½-inch blade.
 - 1 Scalpel, 2-inch blade.
 - 1 Aneurism needle.
- 1 Nickel-plated case containing:
 - 1 Male catheter.
 - 3 Bone drills.
 - 6 Gigli saws.
 - 1 Obturator for trocar tube.
 - 1 Trocar.
 - 1 Plaster knife.
 - 2 Wyeth's pins.
 - 2 Handles for Gigli saws.
 - 1 Handle for bone drill.
 - 3 Murphy buttons, 1, 2 and 3.

Ear, Nose and Throat Set

\$39.50 F. O. B. Chicago

Original Cost to U. S. Government, \$159.55

EAR, NOSE AND THROAT SET CONTAINS:

- 1 Adenotome, La Force's.
- 1 Applicators, nasal, Bosworth's.
- 1 Applicator, nasal, special.
- 3 Catheters, Eustachian, silver, sizes 1, 2 and 3.
- 2 Chisels, mastoid, Schwartz's, sizes 1 and 2.
- 1 Chisel, nasal, Freer's submucous.
- 2 Curettes, adenoid, Barnhill's, sizes 1, 3 and 4.
- 2 Curettes, mastoid, Buck's, sizes 1 and 3.
- 1 Drill, antrum, Pope's.
- 1 Elevator, submucous, dull-edged, Freer's.
- 1 Elevator, Freer's, sharp edged, submucous.
- 1 Forceps, ear, angular, Wilde's.
- 1 Forceps, nasal, angular, Knight's.
- 1 Forceps, oesophageal, spiral.
- 1 Forceps, septum, compression, Ash's.
- 1 Forceps, septum, Jansen-Middleton Model.
- 1 Forceps, tonsil-seizing.

- 1 Gag, mouth, Denhardt's.
- 2 Gouges, mastoid, Schwartz's, sizes 1 and 2.
- 1 Headband, metal, folding.
- 1 Head mirror, 3½ inches, with ½-inch opening.
- 1 Knife, paracentesis, small, light flexible shank.
- 1 Knife, submucous, Freer's, flat, round-bladed.
- 1 Knife, submucous, Freer's, half-round straight.
- 1 Knife, swivel, Ballenger's small size.
- 1 Knife, turbinate, Ballenger's right and left.
- 2 Mirrors, laryngeal, holtable, sizes 1 and 3.
- 1 Otoloscope, Siegel's pneumatic, metal, with three specula.
- 1 Scissors, nasal, Knight's, screw lock.
- 1 Separator, tonsil, special model.
- 1 Snare, tonsil, Brown's, one plain and one ring tip.
- 1 Speculum, nasal, bivalve, Bosworth's tempered steel.

- 1 Speculum, nasal, septal, Goldstein's tempered steel.
- 1 Syringe, ear, with metal shield, Pomeroy's 2-ounce.
- 1 Syringe, tonsil, with extension, metal, with three finger rings and two needles, gold points, one curved and one straight.
- 1 Tongue depressor, Bosworth's, steel plate.
- 1 Tube, diagnostic, Toynbee's, white and black tips.
- 5 Tubes, trachea, regular, Chevalier Jackson, full curved, German silver, silver-plated, sizes 1, 3, 4, 5 and 6.
- 6 Wires, for snares, sizes 3, 5 and 7 (two spoils of each).
- 3 Specula, ear, Brown's, metal, set of three.

AMERICA'S GREATEST "BUY" In a Physician's Bag . . .

I AM in an unusual position to send you the most satisfactory Physician's Bag you've ever carried -- at a distinct saving if you act promptly!

14,381 Doctors acclaim this "HandiBag" far superior to the ordinary Physician's Bag. Why?

1. On one side are 5 moisture-proof pockets for bottles. No danger if a stopper comes out. The pockets are lined with hospital rubber.

2. On other side a full-length, rubber-lined pocket containing four open folders for history sheets, prescription blanks, call list, rubber gloves. With folders removed, pocket holds stethoscope, surgical instruments.

3. Whole center space for larger instruments, bulky objects. A New York City Physician writes, "Unique convenience and adaptability make it the finest bag I could have."

4. Tough, genuine Cowhide Leather. Resists mars and scuffs. Rich black or dark brown. Solid brass, 3-position lock. Name plate identifies bag quickly in busy hospital. Bag is as good-looking as convenient.

Let me send this "HandiBag" -- for you to see the difference between it and the ordinary Physician's Bag -- with no obligation to keep it. Return it for ANY reason, or no reason.

A SURPRISE -- THE LOW PRICE!

If you find the bag everything I say, what would you expect to pay? \$10? No, this is not just an ordinary bag. \$15 -- that other good bags sell for? That's more like it.

Well -- if you keep the "HandiBag", you need write your check for only \$7.95!

14 in. long
12 in. high
8 in. wide

What Other Doctors Say

"I have used your HandiBag for four years. There's nothing on the market like it for twice the money." H. T. L., M. D., Riverside Drive, New York.

"I like the bag particularly because of its roominess and convenient pockets. It is much better than my previous bag which cost double the price!" K. A. B., M. D., Cincinnati, O.

"The biggest value ever offered the medical profession." R. V. D., M. D., LaFayette, La.

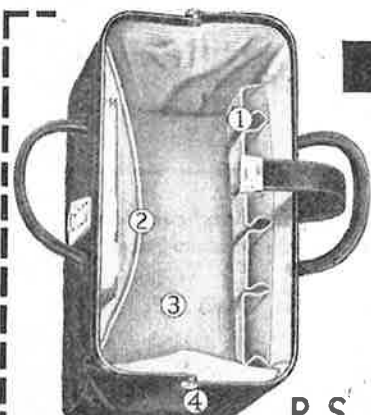

"The HandiBag costs only half the price it should." C. L. M., M. D., St. Louis, Mo.

"Dealers here tell me they consider it equal to bags costing \$12 to \$15." A. J. L., M. D., Guernville, Cal.

Just tell on the coupon which color you prefer. The bag comes postpaid, for a week's Free Trial.

Send the coupon NOW! -- while the low price holds good. And prepare to see the finest Physician's Bag you've ever laid eyes on.

John L. Blair

HOSPITALS AND SANITARIA FOR SALE

PATIENTS WITH LIMITED INCOME ARE GIVEN opportunity to attend a part pay clinic in connection with Greens' Eye Hospital in San Francisco. The facilities of this hospital are especially designed for ophthalmology and include x-ray, radium, physio- therapy and clinical laboratories. Note illustration on page 48 and for complete information address com- munications to superintendent. Ad

MISCELLANEOUS

OFTEN TRAVELING TOGETHER, NERVOUS troubles and sleeplessness make trouble for the phy- sician. A simple method which may relieve insomnia is the use of Horlick's Malted Milk. The story of how this food operates to soothe the patient and build up his system is told on page 51. Ad

AT HOME OR IN THE HOSPITAL, IT IS EASY to make palatable bread for the diabetic with Lister's casein palmitic dietic flour. This flour is adver- tised only to physicians. Composition and prices are given on this page. Ad

SELF-MEDICATION WITH PATENT PILLS SEEMS to be getting less popular. One of the reasons is that people are getting acquainted with helpful foods, such as Kellogg's All-Bran, advertised on page 45. The fiber in All-Bran absorbs moisture, forming a soft mass which promotes natural intestinal action. Many physicians have determined its value for themselves and are recommending it to their patients. Ad

DON'T PUT IT OFF UNTIL TOMORROW— Because today's the time to make your hotel reserva- tion for the 1931 A.M.A. session at Philadelphia, June 8-12. A list of approved hotels, with rates, is given on page 35. Reservations are going in rapidly, so don't delay too long! Ad

ONE OF THE NOTABLE FEATURES IN CONNEC- tion with Merck's Zinc Stearate is the can in which it is sold. It has a self-closing top which can be opened only with considerable thumb pressure on the patented slide. In addition to this safeguard, the powder is delicately soft and waterproof, keeping the skin dry and preventing chafing. Illustrations appear on page 11, and a can of the powder for free trial will be sent to physicians upon request. Ad

LOOKING FOR FOOT COMFORT, DOCTOR? IF you are, why not try the genuine Wright Arch Pre- server Shoe. The four features which have made this shoe such an important health factor are described on page 24. Ad

THE FIGHT AGAINST CANCER IS A MATTER that touches the interests of practically every phy- sician and his clientele. All over the world new find- ings on diagnosis and treatment are being developed. To coordinate all of this information for utmost use- fulness to the physician is a task now essayed by the Chemical Foundation and announced in the four page special color insert, this issue of The Journal (between advertising pages 36 and 37). The convenient post card will enable you to become at once a reader of the American Journal of Cancer and of Radiology, two important units in the Foundation's crusade against cancer. Ad

Typical: "Ad in Journal for intern was very successful and we are supplied. Please dis- continue."

"Common Colds" of Early Spring

Uncertain weather—the damp, sloppy days of March and April—bring colds and sniffles very easily.

The routine use of Nichols Nasal Syphon is suggested whenever there is the slightest indication of the appear- ance of the common "head cold." Prescribe it as a valuable aid to pre- vention and alleviation. It is safe—and it affords considerable relief from annoying effects, gently drawing out the offending material, and leaving the mucosa soothed and refreshed.

Nichols Nasal Syphon is a strictly ethical device, sold only on prescrip- tion through the druggist—and ten years of clinical experience testifies to its usefulness in conditions in and around the nasal tract.

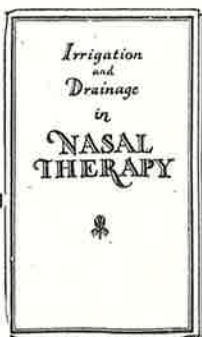

If You Haven't Tried It

Add. 6701 I, % AMA.

(Continued on page 33)

Two Nozzles —AND WHY!

NASAL irrigation must be safe to be valuable—and yet its indications are many.

The **NICHOLS NASAL SYPHON** is a patented device which has enjoyed more than ten years' successful use by hundreds of leading physicians throughout the country.

Note particularly the **TWO** nozzles. A prescribed, antiseptic solution may be introduced into the entire nasal cavity under perfect control—note automatic shut-off—and immediately drawn, or sucked out by the other nozzle, bringing with it much of the muco-purulent material and pus excretions. There has never been a report of a case where more remote areas were affected in the slightest, and many are the reports of extreme usefulness in Rhinitis, Hay Fever, Sinusitis, Ethmoiditis, Catarrh, and Influenza.

It's the **TWO** nozzles—and the principle of negative pressure (suction) which does the work. The device is safe, sane, and really scientific, and is the only one presenting the patented features that make it so.

Prescribe it today. Try it yourself. All drug stores have it available—or write for special trial proposition.

Instructive Book—FREE

From 1812 To 1930—

IODINE has stood the test of time!

Physicians and surgeons have used Tincture of Iodine for many years in preparing their patients for operations—its consistent sterilizing dependability is the reason!

FACE the facts! The forward march of medical science has left unshaken, the confidence of the great body of surgeons and physicians in IODINE. It has staunchly stood the test of time—from scratch to major operation!

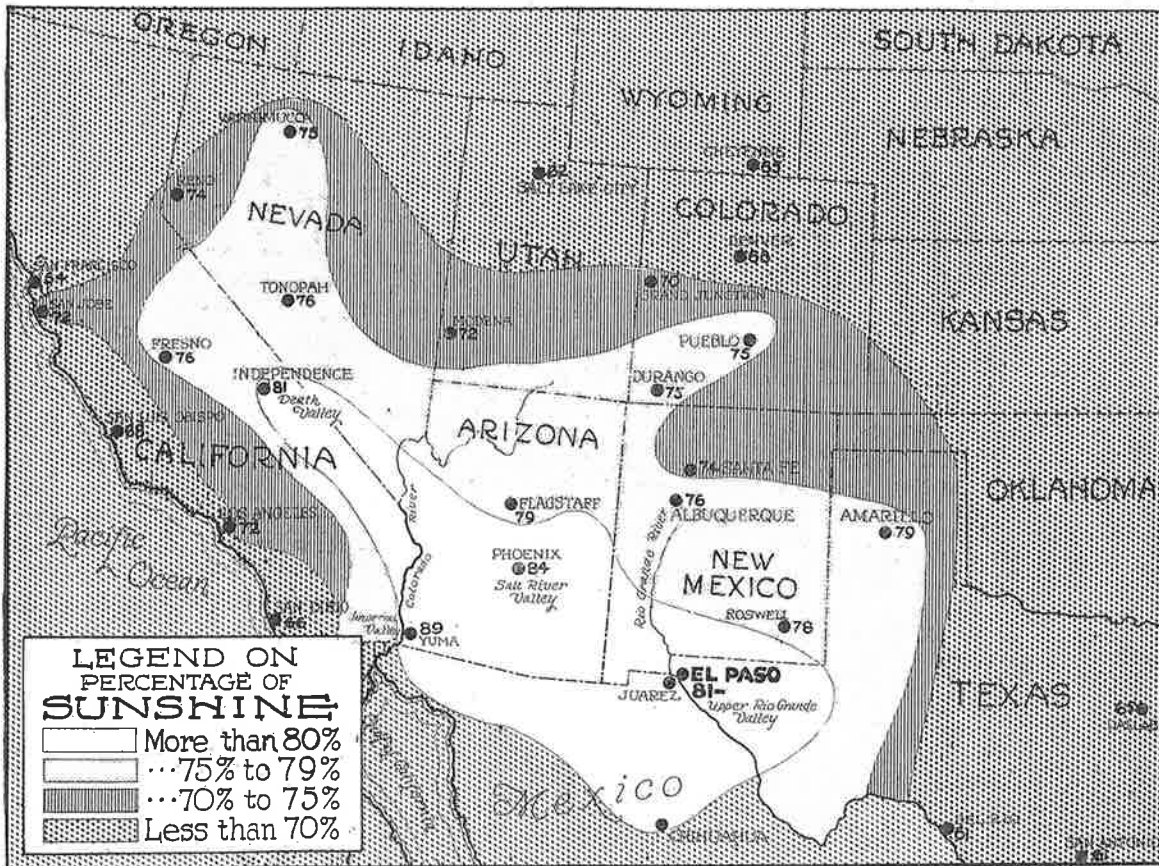

Discovered in 1812, IODINE has steadily borne out its early promise of effectiveness. In 1930 it is still in the first line of defense against sepsis—a trustworthy antiseptic in modern medical practice.

Ask yourself: "Where can I obtain an antiseptic that so adequately meets the need for high germicidal potency, great penetrating power, and sterilizing dependability?" How capably, effectively, IODINE answers the question and removes doubt!

There is no substitute for IODINE!

We shall be pleased to send you, without charge, copies of the interesting booklet, "The Conquest of Infection."

IODINE EDUCATIONAL BUREAU
64 Water Street New York, N. Y.

Here Are Authentic Facts About the Nation's Climate

THESE facts are yours for the asking, doctor; no need to dig through weather bureau records . . . we've done that for you. And we've put up all the weather information we could get for thirty-five communities in attractive, easy-to-read form, to give you and your patients the true facts. So sure are we that El Paso's high, dry, sunny days will prove of real benefit to sufferers from pulmonary diseases that we are glad to leave the decision to you—after you get the facts. May we send this authentic climatic information to you?

Not only for tuberculosis, bronchitis and asthma patients, but for many other afflictions, such as the ever-prevalent sinus trouble, El Paso's kindly climate has proved of inestimable value. We believe it will help your patients, too.

El Paso TEXAS

The Gateway Club, 320 San Francisco St.

Gentlemen:

Please forward your climatological data chart and the booklets: "Filling the Sunshine Prescription," and "El Paso in the Land of Better Living."

The Psychological Element in Treating Tuberculosis

THE psychological element is sometimes lost sight of in the treatment of tuberculosis. At Cragmor Sanatorium every effort is made to help maintain the morale of the patient. Nurses and other employees are chosen with the idea of surrounding the patient with cheerful, courteous service. A magazine is published for the patients. A well-stocked library is provided, also moving pictures, music and other entertainment. Patients confined to bed are permitted, under the direction of the physician, to have visitors. The stimulus of contact with sympathetic people is a distinct advantage to the patient.

Rates: Thirty-Five to Seventy-Five Dollars per Week

An Invitation to Physicians

Physicians in good standing are cordially invited to visit The Battle Creek Sanitarium and Hospital at any time for observation and study, or for rest and treatment.

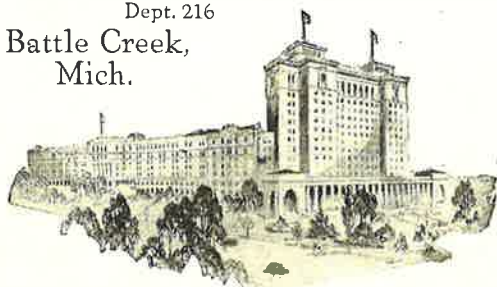

Special Clinics for visiting physicians are conducted in connection with the Hospital, Dispensary and various laboratories.

The Battle Creek Sanitarium has been conducted for more than 50 years as a chartered, self-supporting medical institution. Its purposes are purely philanthropic. Its chief objects are medical relief and race betterment.

"Bulletin of Sanitarium and Hospital Clinics" mailed free on request.

A splendid place for ambulatory post-operative cases to regain strength under the most cheerful and attractive surroundings.

When your patients are tired of home or hospital send them to us for final recuperation.

**Not a
Sanitarium**

Six Hundred and Fifty Rooms (All Outside) In Our Hotel

Logan Clendening in his recent classic, "Modern Methods of Treatment" says, "The benefits to be derived from a Cure at a Mineral Spring depend almost entirely, upon the efficiency of the Medical Organization thereat." This principle has always been and still is the one which has so largely contributed to the deserved fame of the French Lick Springs Hotel at French Lick, Indiana. *Write for Booklet.*

Model No. 43

Illustration showing condition before wearing belt.

Camp Garments are sold at the better drug and surgical houses.

A Ptosis Garment

Effective in Extreme Emaciation

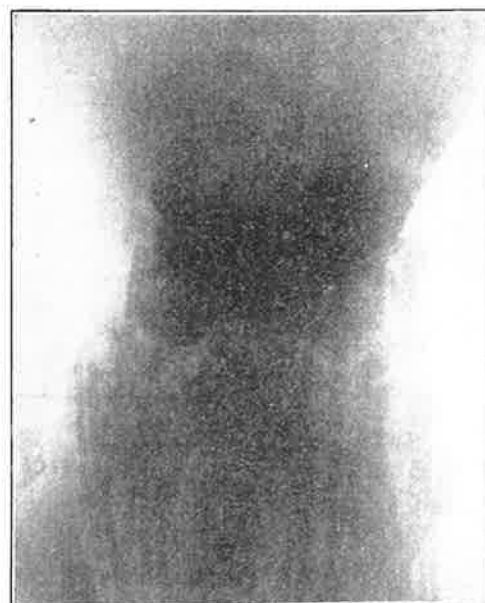

EXTERNAL and internal thinness of ptosis patients, increasing difficulty in correcting condition, has been considered in the construction of this Camp Ptosis Belt. Hood shaped sections fit over prominent hip bones, releasing pressure at crest of ilium; allowing close contact of support and central abdominal wall. The belt stays put, lying flat. In extreme cases pads are inserted. The Camp Patented Adjustment insures ease and quickness of manipulation. The comfort, lightness and flexibility of the garment, and the firm, comfortable uplift it provides has made this an extremely satisfactory garment.

Special X-ray Examination of Stomach Patient Standing. (2c.)

The barium filled stomach is outlined in the standpoint posture and the lowermost portion of the greater curvature is seen to lie approximately 5 cm. below the iliac crest and practically all of the jejunal shadows are below the crest of the ilium.

After application of belt the lowermost portion of the greater curvature of the stomach has moved upwards to about 1 cm. above the iliac crest and the jejunal shadows have also been moved upwards for approximately the same distance. This film also made in standing posture, under same conditions as the one before application of appliance.

Illustration of patient shown wearing Model No. 43.

An IDEAL Local Anesthetic...

NUPERCAINE, "CIBA"

COMPLETE local anesthesia lasting four to twenty hours... MUCH more persistent than cocaine or procaine... effective by topical application as well as by injection... All these outstanding features and others are found in the NEW local anesthetic—NUPERCAINE, "CIBA".

α -Butyloxycinchonic acid
diethyl-ethylenediamide
hydrochloride

NUPERCAINE, "CIBA" marks a new step in the progress of research in the field of local anesthetics and is being rapidly adopted in the United States and Europe wherever clinical tests have been made.

NUPERCAINE, "CIBA" is non-narcotic; consequently, it does not come under the provisions of the "Harrison Act".

NUPERCAINE, "CIBA" is known to the medical profession of Europe as Percain, "Ciba".

← A 1:1000 dilution of NUPERCAINE, "CIBA" is remarkably effective when injected subcutaneously.

A 1:1000 dilution of NUPERCAINE, "CIBA" is as effective as a 1% solution of procaine for infiltration anesthesia.

In small doses of 7.5 to 10 mgm., NUPERCAINE, "CIBA" produces a complete spinal anesthesia.

NUPERCAINE, "CIBA" is effective by topical application as well as by injection.

Quoting from the Journal of A.M.A.

(ISSUE OF NOVEMBER 1, 1930)

Concerning NODULES OF THE BREAST...

"The proper support of the breast, proper instruction, insisting on lack of all constriction, which is quite a common thing among girls who desire to have a boyish figure, has resulted in the disappearance of the lumps in a number of cases."

Concerning PROLAPSE

"Prolapse of the virginal atrophic breast is occurring with alarming frequency in this country owing to the present fashion in dress. Uplifting support of the breast will cure the condition if treatment is begun early."

An ever increasing number of physicians are writing to us inquiring about the Spencer Uplift Brassiere. At the Medical Convention in Detroit this garment attracted unusual interest among physicians and surgeons.

Spencer Uplift Brassieres are prescribed by physicians for breasts that have sagged and lost tone from the wearing of "boyish-form" bandeaus. They are also sponsored by physicians for prolapse of the virginal atrophic breasts; non-malignant nodules of the breast; maternity wear to prevent "caking" and abscess.

Each Spencer Brassiere is designed especially for the wearer. The bust-pockets are fashioned to provide adequate support and positive uplift, even when the breasts are abnormally heavy and pendulous.

The Spencer Corsetiere will call at your office or patient's home to take measurements under your supervision. Look in the telephone book under "Spencer Corsetiere" or write to us for booklet.

Name.....Address.....

THE DESERT SANATORIUM and INSTITUTE of RESEARCH

Tucson, Arizona
Altitude 2600 Feet

Central Driveways, Administration Building, Patients' Courts

THE Desert Sanatorium enjoys a superb setting in the cactus-clad plains of Southern Arizona, girt round by deep-clefted and canyoned mountains, five miles northeast of the City of Tucson, Arizona, the centuries-old Pueblo of a vanished civilization. It is a region of warm, dry and sunny days and restorative star-crisp nights.

The Sanatorium provides complete facilities for medical diagnosis and treatment. It is not a hospital for chronic pulmonary tuberculosis, but accepts patients with the widest variety of acute and chronic ailments; for example, sinusitis, basilar pulmonary infections and asthma, cardio-renal-vascular insufficiency, post-influenza and post-operative debility, arthritis, non-pulmonary (surgical) tuberculosis, to mention only a few.

Thorough diagnosis characterizes the approach to the individual case, and treatment is instituted as indicated. The Sanatorium ex-

ploits no special therapeutic procedure: through a highly capable staff—one resident physician for every fifteen (or fewer) in-patients—it practices every standard and accredited type of treatment to fit the individual case.

Appointments the acme of comfort, convenience and attractiveness. Every apartment with unobstructed view and private screened porch attached.

Cuisine, unsurpassed and universally satisfying, planned and administered by staff of expert graduate dietitians. *Maitre d'hotel* service in dining room.

The regular rates are all-inclusive, accounting for all routine treatment and diagnostic measures, tray service, etc., except for a moderate initial diagnostic "working-out" fee charged all patients.

Illustrated descriptive booklet mailed on request.

RESTFUL SLUMBER WITH NEONAL

Insomnia caused by physical or mental fatigue or worry, psycho-neuroses, obsessions and mild cases of epilepsy usually yield to Neonal (n-butyl-ethyl barbituric acid). Small doses induce tranquil slumber usually of seven to eight hours duration, free from side and after-effects.

The advantages of Neonal as a hypnotic and sedative are:

1. Neonal is practically non-toxic in therapeutic doses.
2. Neonal is three times more efficient than Barbitol.
3. Its continued use does not cause skin eruptions as do the bromides.
4. Neonal has no noticeable action on the heart, circulation or kidneys.
5. Neonal is non-narcotic and repeated administration does not readily lead to a tolerance to the drug.

Neonal is a "Council Accepted" product. The 1½ grain tablets are supplied in bottles of 100 and 1000; the powder in 1-ounce and 4-ounce bottles. Your druggist is supplied, or order direct.

Try Neonal yourself after an unusually hard day. You will feel refreshed and fit the next morning. The coupon will bring you a clinical sample and literature.

Faulty Diet At Base of Many Dental Ills

Investigations Show Importance of Vitamin C

AN INSUFFICIENT supply of essential food elements is a contributing factor in dental decay, gingivitis and kindred dental disorders.

This is the conclusion reached by independent investigators.

Case records on 191 patients in one research disclosed an almost uniform correlation of dental disorders with a vitamin C deficiency. No other diet fault was common to the group.

Two full-sized glasses of orange juice with the juice of half a lemon in each were found to provide an ample daily supply of antiscorbutic in almost every case noted. The progress of decay was arrested; gingival irritations improved and in many cases disappeared entirely.

Other authorities have substantiated these findings and agree that vitamin C is as important to the maintenance of healthy dental tissues as vitamin D is to their formation. Orange and lemon juices are declared the most

concentrated sources of vitamin C and the most satisfactory since they seldom lead to physical disturbances.

A collection of reprints containing the latest information on this important subject will be sent gratis to members of the dental and medical professions. Mail the coupon.

Fads and Facts about Diets ~

IT HAS been estimated that three fourths of all mankind in all known periods of time have been practically vegetarian. We are told that vegetarian animals are strong, large, longlived, and that they are placid and reposeful like the elephant, horse, rhinoceros and goat—but who wants to be a goat?"

This is not a plea for or against vegetarianism, but a paragraph from "Fads and Facts About Diets," in the April HYGEIA. In this whimsical vein, Dr. Russell S. Boles corrects many widespread food fallacies and gives vital information regarding food properties and their place in the diet. Just the kind of information you'd like to give your patients if your busy schedule allowed. The April HYGEIA will be read with quick appreciation and interest by your patients. A selected group of excellent health features make up a varied table of contents. In addition to "Fads and Facts About Diets" we are told—

When Laxatives Are Dangerous

Acute abdominal pains should be a warning of DANGER but how few of the laity know this pertinent fact. Consequently, appendicitis, acute perforations of the stomach or duodenum, intestinal obstruction, acute pancreatitis and acute salpingitis take a relentless and often needless toll each year. Dr. John O. Bower does not mince words in telling what to do, and what not to do in the presence of acute abdominal pains in his article "The Abuse of Laxatives."

Other April HYGEIA Features

In addition, April brings this interesting array of articles to HYGEIA readers: "When Johnny Doesn't Eat"; help for solving an age-old nutrition problem; "Cancer of the Stomach and Bowel," third of a series; "When Mother Is Away," hints for keeping young charges entertained; "Unheeded Hazards of the Home"; "The Bird with the White Breast," courage for the tuberculous; "What Every Mother Should Know About Her Child's Teeth"; children's department, editorials, etc.

How HYGEIA Can Serve You

Copies of HYGEIA in the hands of waiting patients perform a real and sincere service for the busy physician. HYGEIA tells your patients sanely, helpfully, how to build and maintain their health, how to recognize the quack, the danger of delay in consulting you at the first danger signals, the progress of scientific medicine, advice on the care of the baby, what not to eat and why—all this and more. And the information is dispensed in interesting, readable style by men and women who are leaders in their field, and who have captured the art of writing for the laity. If HYGEIA is not on your reception room table, subscribe today at the special introductory rate.

When You Remit Your 1931 Dues

why not make it the occasion to subscribe to one or more of the eight special journals published by the Association? Here are publications that record the findings of researchists in their special fields. They carry their readers to the very frontiers of medicine.

Use The Colored Envelope Form in December 20 Issue of The Journal A.M.A.

This convenient remittance form was inserted in each copy of the December 20 issue. Names of each of the special journals with their subscription rates were included thereon. One remittance will thus cover The Journal A. M. A. and any of the special journals you may desire.

JOURNALS COVERING EIGHT SPECIAL FIELDS

Archives of Surgery

Researchists in surgery look beyond operative technic to ultimate end-results. With this viewpoint, ARCHIVES OF SURGERY is devoted chiefly to complete scientific study of groups of cases.

\$8.00 a year. Canada, \$8.40. Foreign, \$8.75

Archives of Pathology

The pathologist reveals the essential nature of disease, standing at the sources of scientific medicine. ARCHIVES OF PATHOLOGY record typical studies of diseases with information for clinical practice.

\$6.00 a year. Canada, \$6.40. Foreign, \$6.75

Archives of Neurology and Psychiatry

Presents significant data on diseases of the nervous system. Discussions on both functional and organic neurologic cases. \$8.00 a year. Canada, \$8.40. Foreign, \$8.75

Archives of Dermatology and Syphilology

From investigations are presented new and advanced ideas from all over the world on skin diseases and syphilis.

\$8.00 a year. Canada, \$8.40. Foreign, \$8.75

Archives of Internal Medicine

Reports of clinical and laboratory study into the nature, diagnosis and treatment of disease in its various aspects.

\$5.00 a year. Canada, \$5.40. Foreign, \$5.75

Archives of Ophthalmology

A continuation and enlargement of the former Archives founded by Herman Knapp in 1869. Original papers contributed by leading ophthalmologists; also résumé of one phase of this specialty in each issue.

\$8.00 a year. Canada, \$8.40. Foreign, \$8.75

Archives of Otolaryngology

Concentrates exclusively on original research into ear, nose and throat diseases. Special features are: monthly article on progress in Otolaryngology, résumé of one phase of the subject, etc. Finely illustrated.

\$6.00 a year. Canada, \$6.40. Foreign, \$6.75

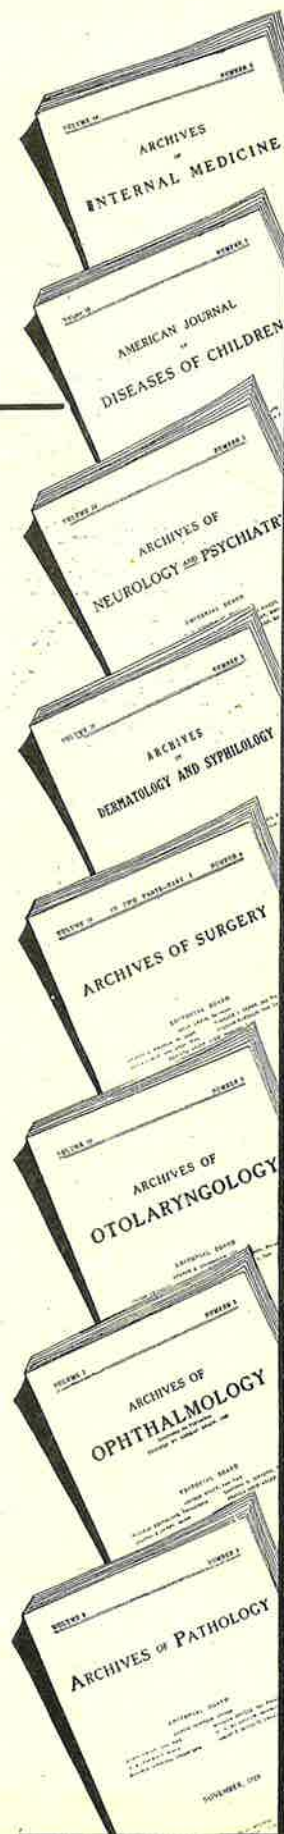

American Journal of Diseases of Children

The original articles on such subjects as contagious diseases, new therapeutic procedures, etc., offer stimuli to the work of both practitioner and pediatrician—and the new ideas and methods in Pediatrics may interpret various pathologic conditions he discovers.

\$8.00 a year. Canada, \$8.40. Foreign, \$8.75

AMERICAN MEDICAL ASSOCIATION

535 North Dearborn Street, Chicago

Kelly and Cullen's Myomata of the Uterus

"It must be considered as the most comprehensive work of the kind yet published. It will always be a mine of wealth to future students."—*Surgery, Gynecology and Obstetrics*.

AMPUTATION THROUGH THE CERVIX (REDUCED)

"Within the covers of this monograph every form, size, variety and complication of uterine fibroids is discussed. To the specialist no less than to the practitioner the monograph should strongly appeal. It is a splendid example of the rapid progress of American professional thought."—*New York Medical Journal*.

"Few medical works in recent years have come to our notice so complete in detail, so well illustrated, so practical, and so far-reaching in their teaching to general practitioner, specialist, and student alike."—*Bulletin Medical and Chirurgial Faculty of Maryland*.

Large octavo of 700 pages, with 388 original illustrations, 19 in colors. By HOWARD A. KELLY, M.D., Professor of Gynecologic Surgery in Johns Hopkins University; and THOMAS S. CULLEN, M.B., Associate in Gynecology in Johns Hopkins University.

Cloth, \$7.50 net; Half Morocco, \$9.00 net.

Kelly and Noble's Gynecology and Abdominal Surgery

"There are many important chapters which should be specially noted. The illustrations have been done by Hermann Becker and Max Brödel, and their beauty and exactness are unsurpassed in any other publication. The work is a masterpiece."—*Long Island Medical Journal*.

"It is needless to say that the work has been thoroughly done; the names of the authors and editors would guarantee this; but much may be said in praise of the method of presentation, and attention may be called to the inclusion of matter not to be found elsewhere."—*American Journal of the Medical Sciences*.

Edited by HOWARD A. KELLY, M.D., Professor of Gynecologic Surgery in Johns Hopkins University; and CHARLES P. NOBLE, M.D., Clinical Professor of Gynecology in the Woman's Medical College, Philadelphia. Two imperial octavos of 850 pages each, containing 880 original illustrations, some in colors.

Per volume: Cloth, \$8.00 net; Half Morocco, \$9.50 net.
