

Some questions about filter cigarettes that may have occurred to you, Doctor

and their answers by the makers of

Kent

Q: What materials are used in cigarette filters?

A: Until just recently, cellulose, cotton or crepe paper were the only materials used in cigarette filters.

Now, after long search and countless experiments, KENT's "Micronite"* Filter has been developed. It employs the same filtering material used in atomic energy plants to purify the air of minute radio-active particles.

Q: How effective are these cigarette filters?

A: Scientific measurements have proved that cellulose, cotton or crepe paper filters do not take out a really effective amount of nicotine and tars.

However, these same tests also have proved that KENT's exclusive Micronite Filter *approaches 7 times the efficiency of other filters in the removal of tars and nicotine* and is virtually twice as effective as the next most efficient cigarette filter.

Q: Do physiological reactions to filter cigarettes differ?

A: The drop in skin temperature occurring at the finger tip induced by filtered cigarette smoke was measured according to well-established procedures.

For conventional filter cigarettes, the drop was over 6 degrees. For KENT's Micronite Filter, there was no appreciable drop.

Q: Does an effective cigarette filter also remove the flavor?

A: KENT's Micronite Filter . . . the first cigarette filter that really works . . . lets smokers enjoy the full pleasure of a really fine cigarette, yet gives them the greatest protection ever from tars and nicotine.

In less than a year's time, the new KENT has become so popular it outsells brands that have been on the market for years.

takes out up to 7 times more

nicotine and tars—

leaves in full, rich tobacco flavor.

Entered as second-class matter, November 16, 1932, at the post office at Boston, Massachusetts, under the Act of March 3, 1879.
Published weekly at 8 Fenway, Boston 15. Domestic, \$8.00 per year.

from Boston . . . a Symposium on Treatment

From the leading medical centers of Boston comes this Symposium on *Specific Methods of Treatment* in the September Number of the MEDICAL CLINICS OF NORTH AMERICA. Included are sixteen timely topics on such subjects as: Modern Therapy of Coronary Artery Disease, Bronchiectasis in Older People, Acute Liver Disease, Prevention and Treatment of Drug Allergies, Pediatric Orthopedics, Management of Pregnancy Complicating Diabetes and of Children of Diabetic Mothers. In addition, there are three special articles of widespread interest on general topics. Every article in every Number of the MEDICAL CLINICS is written on an extremely practical level. These bimonthly books of postgraduate medicine bring you the new things in medicine while they are still new.

The Medical Clinics of North America. By leading internists. Issued serially, every other month, one illustrated volume of about 300 pages, 6" x 9". Per year (six Numbers): Cloth, \$18.00; Paper, \$15.00. Sold only by a year of six consecutive Numbers.
